

# TRACE-PRO™

COMPACT, RUGGEDISED EXPLOSIVES TRACE DETECTOR

## Feature Highlights

- Fast, accurate answers within 15 seconds
- Non-radioactive IBS technology
- Unique probe-based sampling technique; no gloves or swab line
- On-board camera and GPS for evidence collection
- Only explosives detector using commercial AA batteries

Military, Emergency Response, Law Enforcement, and Security professionals face the challenge of detecting traces of explosives from multiple surfaces and locations — everyday. They need fast, accurate results to indicate if a person or object has been in contact with an explosive substance.

TRACE-PRO is a non-radioactive explosives trace detector designed to make it quick and easy to collect and analyse samples from suspect goods, materials or people.

TRACE-PRO is ready to go in less than three minutes and can detect and identify common explosives in seconds.

TRACE-PRO's unique IBS user design protects the system from contamination, providing the fastest clear down of any explosives trace detector in its class. This significantly increases the number of

samples which can be analysed, providing a more efficient screening operation.

Thanks to the revolutionary probe-based sampling inside technique, TRACE-PRO doesn't need gloves, swabs sticks or difficult to open lids. Swabs are quick and easy to replace and designed for multiple use.

An exclusive integrated evidence collection package provides further information, such as time/date stamp, complete alarm data, photographs, and GPS coordinates, all collected in a single file. Data can be downloaded from the unit by USB connection, providing an easy and secure way to store and access vital information for use against potential suspects.

The intuitive user interface is simple to understand and operate, providing the user through visual symbols, animations and alarms.

Rabiej,2014-11-01 For well experienced lawyers the Federal Civil Procedure Manual provides a comprehensive treatment of procedural law in federal courts that an attorney can rely on for quick answers to discrete issues For new attorneys the Manual provides a complete blueprint for commencing and working through a case in court The copious and very recent case law updating provides authoritative sources that go into great detail about the designated issues The authors have nearly 50 years experience in developing crafting and approving amendments to the Civil Rules They were intimately involved with the amendment process for virtually all the Civil Rules Their combined experience brings unmatched insights into the Civil Rules The Federal Civil Procedure Manual addresses not only procedural law but it also contains extensive discussion of jurisdictional matters The chapters on arbitration as an alternative dispute procedure are typically not addressed in a procedural book     Vapour and Trace Detection of Explosives for Anti-Terrorism Purposes M. Krausa,2012-11-06

The fast detection of explosives from the vapor phase would be one way to enhance the protection of society against terrorist attacks Up to now the problem of detection of explosives especially the location of explosives whether at large areas e g station halls theaters or hidden in cars aircraft cargo baggage or explosives hidden in crowds e g suicide bombers or bombs in bags has not been solved Smelling of explosives like dogs do seems to be a valuable tool for a security chain In general different strategies can be adopt to the basic problem of explosive detection bulk detection vapor detection Normally meetings cover both aspects and applications of the detection Even though both methods might fulfill special aspects of a general security chain the underlying scientific questions differ strongly Because of that the discussions of the scientists and practitioners from the different main directions are sometimes only less specific Therefore the NATO Advisory Panel in Security Related Civil Science and Technology proposed a small series of NATO ARW s which focuses on the different scientific aspects of explosives detection methods This book is based on material presented at the first NATO ARW of this series in Moscow which covered the topic Vapor and trace detection of explosives The second ARW was held in St Petersburg and treated the topic Bulk detection methods The third workshop was held in Warwick and focused on electronic noses which cover a somewhat different aspect of vapor detection     *Manual of Environmental Microbiology* Cindy H.
