Invisible Fields José Luis de Vicente,Honor Harger,Josep Perelló,2011 With the invention of telecommunications technologies in the late nineteenth century the radio electric spectrum became a tool for rethinking the world in which we live The emission of radio waves did away with physical distances crossing borders and cultures and acting as a powerful catalyst for trade Moreover the radio spectrum is the invisible infrastructure on which our information and communication technologies have been built The history of its scientific discovery and how it was gradually colonized by the media the military complex and activists and hackers is one of the most fascinating stories of the twentieth century The future uses of the radio electric spectrum in the twenty first century and its new potential are being decided now with the end of analogue TV broadcasting worldwide marking the most important transformation of uses in the radio electric space in decades This catalog sets out to examine these issues and shed a little light on the most intriguing stories about the radio electric spectrum **Swahili Tales, as told by natives of Zanzibar. The Motivated Sign Olga Fischer, Max Nänny, 2001-01-01 This volume a sequel to *Form Miming Meaning* 1999 offers a selection of papers given at the second international symposium on iconicity Amsterdam 1999 In the light of semiotic linguistic and literary theory the studies gathered here investigate how iconicity works on all levels of language in literary texts and other forms of verbal discourse They investigate among other subjects the semiotic foundations of iconicity the role played by iconicity in language evolution and in the way words are positioned syntactically Special consideration is given to the iconic nature of metaphor and the mise en abyme to iconically motivated punctuation and other typographic matters such as the manipulation of colour fonts and spacing in advertising and in poetry Other studies show how iconicity influences Shakespeare s rhetoric the

structural design of Margaret Atwood's writings and the changing fashions in fictional landscape description. Thus these analyses of the motivated sign represent yet another strong challenge to Saussure's dogma of arbitrariness Jakobson

"The smell of Ujamaa is still there" Daniel Mann, 2017-12-04 Fifty years after the Arusha Declaration this book sets out to reevaluate one of the most important roots of Tanzania's Ujamaa Socialism. The Ruvuma Development Association, based on a basic democratic movement of young politicized farmers, this organization not only brought together up to 18 cooperative villages in southwestern Tanzania, it also became the inspiration for President Nyerere to put his vision of a modern socialist society built on the image of the traditional extended family into a concrete development model on national scale. Led by a participative understanding of empirical research, this explorative study has analyzed the local history of Ujamaa in three case study villages within Ruvuma. Through employing a mix of expert and narrative interviews as well as group interviews and villager questionnaires, the study sheds new light on the local perceptions of Ujamaa history and communal development as well as on the interrelations between local and national scale on Tanzania's path of development. It identifies the recent farmers groups *vikundi* as some of the most important heirs to the Nation's socialist ideology and concludes that in many aspects the smell of Ujamaa is still there.

Descriptive Analysis of Sound and Silence in the Audiovisual Translations of American and Japanese Movies Reito Adachi, 2025-04-01 This book delves into the powerful role of sound and silence in film translation, revealing how acoustic choices shape cultural perception and audience experience. Through in-depth analyses of acclaimed films like *Spirited Away* and *The Lego Movie*, it shows how subtle shifts in silence, sound effects, and music can bridge or widen the cultural divide. Perfect for translators, filmmakers, and anyone curious about the hidden layers of cross-cultural storytelling.

The Great Stink of Paris and the Nineteenth-Century Struggle Against Filth and Germs David S. Barnes, 2006-06-06 Ultimately, the attitudes of physicians and the French public were shaped by political struggles between republicans and the clergy, by aggressive efforts to educate and civilize the peasantry, and by long-term shifts in the public's ability to tolerate the odor of bodily substances. Donald Reid, University of North Carolina at Chapel Hill, *American Historical Review*.

An Eye-Tracking Study of Equivalent Effect in Translation Callum Walker, 2020-11-23 This book provides a detailed example of an eye-tracking method for comparing the reading experience of a literary source text readers with readers of a translation at stylistically marked points. Drawing on principles, methods, and inspiration from fields including translation studies, cognitive psychology, and language and literary studies, the author proposes an empirical method to investigate the notion of stylistic foregrounding, with style understood as the distinctive manner of expression in a particular text. The book employs Raymond Queneau's *Zazie dans le métro* 1959 and its English translation *Zazie in the Metro* 1960 as a case study to demonstrate the proposed methods. This book will be of particular interest to students and scholars of translation studies as well as those interested in literary reception, stylistics, and related fields.
