Collected and Prepared for the Press, by W. Burton. (A General Index ... By W. Burton.). John WALKER (Fellow of Trinity College, Dublin.),1838 Middle Babylonian Texts in the Cornell Collections, Part II Elena Devecchi,2020-08-17 This volume completes the publication of Middle Babylonian texts from the Rosen Collection that date to the Kassite period a project that was initiated by Wilfred H van Soldt with CUSAS 30 in 2015 In this book Elena Devecchi provides full transliterations translations and extended commentaries of 338 previously unpublished cuneiform tablets from Kassite Babylonia ca 1475 1155 BCE Most of the texts are dated to the reigns of Nazi Marutta and Kada man Turgu but the collection also includes one tablet dating to the reign of Burna Buria II and a few documents from the reigns of Kada man Enlil II Kudur Enlil and agarakti uria as well as some that are not dated The tablets published here are largely administrative records dealing with the income storage and redistribution of agricultural products and byproducts animal husbandry and textile production while legal documents and letters comprise a smaller portion of the collection Evidence suggests that these documents originated from an administrative center that interacted closely with the provincial capital Nippur and must have been located in its vicinity They thus expand significantly our previous knowledge of the Nippur region under Kassite rule hitherto almost exclusively based on sources that came from Nippur itself and provide substantial new data for the study of central aspects of society economy and administration that traditionally lie at the core of research about Kassite Babylonia

Essays and correspondence, chiefly on Scriptural subjects, collected and prepared for the press by W. Burton. [With] General index John Walker,1838 *InfoWorld* ,1987-01-05 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects *Appraisal and the Transcreation of Marketing Texts* Nga-Ki Mavis Ho,2024-01-31 This book contributes to growing debates on transcreation applying an appraisal framework to texts from luxury brands in Chinese and English to reveal new insights into marketing transcreation and set out transcreation as an area of study in its own right The volume charts the origins of the term transcreation emerging from the interplay of established concepts of translation creation localisation and adaptation and ongoing debates on what should be transcreated and how Using these dialogues as a point of departure Ho outlines a way forward for transcreation research by advocating for the use of an appraisal framework taken from work in systemic functional linguistics and employed to evaluate persuasion in language In focusing on marketing texts from the websites of three luxury brands in English and Chinese the book explores how this approach can surface fresh perspectives on the different ways in which the processes and practices of marketing transcreation are used to generate persuasion across

languages The volume looks ahead to the implications for other language pairs and the applications of the appraisal framework to understand transcreation practice of other genres such as literary texts This book will be of interest to students and scholars in translation studies and marketing studies

History of Science, History of Text Karine Chemla, 2005-08-01 two main interacting ways. They constitute that with which exploration into problems or questions is carried out. But they also constitute that which is exchanged between scholars or, in other terms, that which is shaped by one or by some for use by others. In these various dimensions, texts obviously depend on the means and technologies available for producing, reproducing, using, and organizing writings. In this regard, the contribution of a history of text is essential in helping us approach the various historical contexts from which our sources originate. However, there is more to it. While shaping texts as texts, the practitioners of the sciences may create new textual
