*Histories of Technology, the Environment and Modern Britain* brings together historians with a wide range of interests to take a uniquely wide lens view of how technology and the environment have been intimately and irreversibly entangled in Britain over the last 300 years. It combines for the first time two perspectives with much to say about Britain since the industrial revolution: the history of technology and environmental history. Technologies are modified environments just as nature is to varying extents engineered. Furthermore, technologies and our living and non-living environment are both predominant material forms of organisation and self-organisation that surround and make us. Both have changed over time in intersecting ways. Technologies discussed in the collection include bulldozers, submarine cables, automobiles, flood barriers, medical devices, museum displays, and biotechnologies. Environments investigated include bogs, cities, farms, places of natural beauty, and pollution land and sea. The book explores this diversity but also offers an integrated framework for understanding these intersections. **Mapping the Posthuman** Grant Hamilton, Carolyn Lau, 2023-12-22

This book works to delineate some of the major routes by which science and art intersect. Structured according to the origin myths of the posthuman that continue to shape the idea of the human in our technological modernity, this volume gives space to narratives of alter-modernity that resonate with Ursula K. Le Guin's call for a new kind of story which exposes the violence and exploitation driven by a sustained belief in human exceptionalism, anthropocentrism, and cultural superiority. In this context, the posthuman myths of multispecies flourishing given in this collection, which are situated across a range of historical times and locations and media and modalities, are to be thought of as kernels of possible futures that can only be realized through collective endeavour.

*The Mobility of Memory* Luisa Passerini, Milica Trakilović, Gabriele Proglia, 2020-10-06

Feminism, Foucault, and Embodied Subjectivity Margaret A. McLaren, 2012-02-01

Addressing central questions in the debate about Foucault's usefulness for politics including his rejection of universal norms his conception of power and power knowledge his seemingly contradictory position on subjectivity and his resistance to using identity as a political category McLaren argues that Foucault employs a conception of embodied subjectivity that is well suited for feminism She applies Foucault's notion of practices of the self to contemporary feminist practices such as consciousness raising and autobiography and concludes that the connection between self transformation and social transformation that Foucault theorizes as the connection between subjectivity and institutional and social norms is crucial for contemporary feminist theory and politics

Making the Personal Political Jane Fenoulhet, 2017-12-02 Making the Personal Political is an interdisciplinary account of a now forgotten success story in the history of the society and culture of the Netherlands While Dutch women had apparently retreated into domesticity after gaining the vote in 1919 women writers were out there in the market place selling the inside story of women's lives Eight case studies of women writers between 1919 and 1970 trace the unconscious politics of the personal in narratives of women's identity and experience through close readings of texts located in the culture of the time Jane Fenoulhet whose knowledge of Dutch literature and culture in the twentieth century is unparalleled in the English speaking world tracks the public representation of women's private project of self development to the moment when the personal is finally accepted as politically important in Dutch society
