Visual Analysis Partum

Sara Cardona presents her 2009 art image Partum. Cardona is a local Dallas artist whom is a Dallas Community College Professor. Most of her art work is inspired by her childhood and life experiences. Women are the main focus point in her paintings. Cardona can very well relate to the women in her drawings being that they are a reflection of her own emotions (web).

Partum is a portrait of a woman with a shadow of vines covering her face. Her hair is pinned back with decorative butterflies, flowers, beads and corn, which represents her beauty. The woman's facial features are emphasized by the fine darkening of the pencil. She has the eyes of a teenage girl that has had her heart broken or have been through a traumatic experience.

The photo is made of mixed media both dry and wet. According to Cardona this art piece was created with simple office supplies, such as ink, ball point, white out, markers, thread and etc. The painting is drawn in two-dimensional media. This picture doesn't have too much texture but patterns dominate this portrait. The artist carefully drew natural patterns in the woman's hair. Cardona uses contour, calligraphic, directional, hatching lines to create this art work (pg24).

The lady in this image appears to have a blank stare upon her face. Her emotionless look gives the idea that she is hiding something. The thick vines covering

Get the Picture: Visual Literacy in Content-Area Instruction Marva Cappello, Nancy T. Walker, 2019-07-01 Visual sources are increasingly prevalent in today's society. This cross-curricular resource by Marva Cappello and Nancy T. Walker provides teachers with new and engaging strategies to help students closely read visual texts. Teachers will learn to evaluate the complexity of visual texts and match them to their students. Students will learn to analyze visual sources, understand both explicit and implicit messages, interpret underlying meaning, and engage in meaningful discussion. Based on practical research, this approach offers students engagement in the full suite of Language Arts as defined by the International Literacy Association and National Council of Teachers of English: reading, writing, listening, speaking, viewing, and visually representing. The strategies are divided by purpose: receptive and productive strategies, and arranged by content area to support all teachers. Sample lessons for grades K-1 and 2-3 are provided for each strategy. With concrete tools and techniques and a wide range of suggested visual texts to use in the classroom, teachers can prepare students for interaction with primary sources, digital media, and the visual-heavy world of 21st-century learning. Digital downloads of visual texts and student pages are included.

How Students Write: A Linguistic Analysis Laura Louise Aull, 2020-04-01 Broad generalizations about people today are a familiar feature of first-year student writing. *How Students Write* brings a fresh perspective to this perennial observation using corpus linguistics techniques. This study analyzes sentence-level patterns in student writing to develop an understanding of how students present evidence, draw connections between ideas, relate to their readers, and ultimately learn to construct knowledge in their writing. Drawing on both first-year and upper-level student writing, the book examines the discourse of students at different points in their education. It also distinguishes between argumentative and analytic essays to explore the way school genres and assignments shape students' choices. In focusing on sentence-level features such as hedges, perhaps, and boosters, this study shows how such rhetorical choices work together to open or close opportunities for thoughtful exchanges of ideas. Attention to these features can help instructors foster civil discourse, design effective assignments, and expose and question norms of higher education.

Advances in the Visual Analysis of Social Movements Nicole Doerr, Alice Mattoni, Simon Teune, 2013-03-14 This special issue is a key text in the current study of social movements. It introduces new analytical concepts for understanding visuals in social movements and examines case studies from across the globe, such as analysis of the symbols used in the Egyptian uprising and contested images from anti-surveillance protests in Europe.

Fundamentals of Satellite Remote Sensing Emilio Chuvieco, 2009-12-01 An extensive review of remote sensing principles with an emphasis on environmental applications. *Fundamentals of Satellite Remote Sensing* discusses a wide range of topics from physical principles to data acquisition systems and on to visual and digital interpretation techniques. The text focuses on the interpretation and analysis of remote sensing images and how they improve our understanding of environmental processes and their interaction with human activities. The authors discuss new

interpretation approaches including hyperspectral analysis high spatial resolution data and radiative transfer models The presentation includes an analysis of accuracy assessment methods and demonstrates how to integrate remote sensing results with geographic information systems It also covers recent missions such as Terra Aqua Envisat Ikonos Quickbird Geoeye and SPOT 5 as well as LIDAR and interferometric radar The discussion of visual criteria to extract interpretation from satellite images emphasizes differences and similarities with conventional photo interpretation techniques A chapter on accuracy assessment and the connection between remote sensing and geographic information systems helps readers extend the interpretation of satellite images to a more operational applications oriented framework

Visual Thinking for Design Colin Ware, 2010-07-27 Visual Thinking brings the science of perception to the art of design Designers increasingly need to present information in ways that aid their audience's thinking process Fortunately results from the relatively new science of human visual

perception provide valuable guidance In this book Colin Ware takes what we now know about perception cognition and attention and transforms it into concrete advice that designers can directly apply He demonstrates how designs can be considered as tools for cognition extensions of the viewer s brain in much the same way that a hammer is an extension of the user s hand The book includes hundreds of examples many in the form of integrated text and full color diagrams Experienced professional designers and students alike will learn how to maximize the power of the information tools they design for the people who use them Presents visual thinking as a complex process that can be supported in every stage using specific design techniques Provides practical task oriented information for designers and software developers charged with design responsibilities Includes hundreds of examples many in the form of integrated text and full color diagrams Steeped in the principles of active vision which views graphic designs as cognitive tools *Visual Database Systems 3* Stefano

Spaccapietra,Ramesh Jain,2013-06-05 Both the way we look at data through a DBMS and the nature of data we ask a DBMS to manage have drastically evolved over the last decade moving from text to images and to sound to a lesser extent Visual representations are used extensively within new user interfaces Powerful visual approaches are being experimented for data manipulation including the investigation of three dimensional display techniques Similarly sophisticated data visualization techniques are dramatically improving the understanding of the information extracted from a database On the other hand more and more applications use images as basic data or to enhance the quality and richness of data manipulation services Image management has opened a wide area of new research topics in image understanding and analysis The IFIP 2 6 Working Group on Databases strongly believes that a significant mutual enrichment is possible by confronting ideas concepts and techniques supporting the work of researcher and practitioners in the two areas of visual interfaces to DBMS and DBMS management of visual data For this reason IFIP 2 6 has launched a series of conferences on Visual Database Systems The first one has been held in Tokyo 1989 VDB 2 was held in Budapest 1991 This conference is the third in the series As the preceding editions the conference addresses researchers and practitioners active or interested in user interfaces human computer communication knowledge representation and management image processing and understanding multimedia database techniques and computer vision Visual Methods in Marketing and Consumer Research Fatema Kawaf,Ofer

Dekel-Dachs,2024-06-21 Despite the rising popularity of visual research methods from images and collages to videos and animations there is an imminent need for a book that can be a point of reference for learning about visual methods in the field of marketing and consumer research This book offers a comprehensive outlook of visual research methods in the field highlighting their value and offering a practical guide for researchers Building on the experiences and discussions of both experienced and aspiring visual researchers the editors present this book as a go to guide for doing visual research in marketing and consumer research This book encompasses nine chapters guiding the readers through the ABCs of visual research from philosophy to data collection and analysis with a dedicated chapter on research dissemination You can expect

detailed discussions on the ontological and epistemological stance of visual research as well as an elaborate yet simple to follow guide of all aspects of data collection for various forms of visuals be it static images memes collages videos animations and so on The purpose of this book is not only to highlight the value of visual methods in consumer research but also to move this work on and offer a go to hands on guide for novice visual researchers and PhD candidates who wish to conduct rigorous visual research It will be a valuable resource not only for those particularly across marketing disciplines including consumer research and behaviour but also for visual researchers in fields such as sociology and anthropology
