Clearinghouse Review ,1974 Emerald Cities Joan Fitzgerald,2010-03-18 Here is a refreshing look at how American cities are leading the way toward greener cleaner and more sustainable forms of economic development In Emerald Cities Joan Fitzgerald shows how in the absence of a comprehensive national policy cities like Chicago New York Portland San Francisco and Seattle have taken the lead in addressing the interrelated environmental problems of global warming pollution energy dependence and social justice Cities are major sources of pollution but because of their population density reliance on public transportation and other factors Fitzgerald argues that they are uniquely suited to promote and benefit from green

economic development For cities facing worsening budget constraints investing in high paying green jobs in renewable energy technology construction manufacturing recycling and other fields will solve two problems at once sparking economic growth while at the same time dramatically improving quality of life Fitzgerald also examines how investing in green research and technology may help to revitalize older industrial cities and offers examples of cities that don t make the top ten green lists such as Toledo and Cleveland Ohio and Syracuse New York And for cities wishing to emulate those already engaged in developing greener economic practices Fitzgerald shows which strategies will be most effective according to each city s size economic history geography and other unique circumstances But cities cannot act alone and Fitzgerald analyzes the role of state and national government policy in helping cities create the next wave of clean technology growth Lucid forward looking and guided by a level headed optimism that clearly distinguishes between genuine progress and exaggerated claims Emerald Cities points the way toward a sustainable future for the American city
