World Water Assessment Programme Sri Lanka Case Study K. A. U. S. Imbulana, Peter Droogers, Ian W.

Makin, 2002-04-07 The Case Study Workshop was organized with the objective of obtaining the necessary input from the experts on different subject areas of water resources, subject those views and discussion among the stakeholder agencies and synthesize the information to a report on the case study. The outcome of the Workshop would eventually transform into the contribution of Sri Lanka to the first WWDR. *Water Resource Management in South Asia* Anjal Prakash, 2022-05-29 This cluster of books presents innovative and nuanced knowledge on water resources based on detailed case studies from South Asia: India, Bangladesh, Bhutan, Nepal, Pakistan, and Sri Lanka. In providing comprehensive analyses of the existing economic, demographic, and ideological contexts in which water policies are framed and implemented, the volumes argue for alternative, informed, and integrated approaches towards efficient management and equitable distribution of water. These also explore the globalization of water governance in the region, particularly in relation to new paradigms of neoliberalism, civil society participation, integrated water resource management, IWRM, public-private partnerships, privatization, and gender mainstreaming. These volumes will be indispensable for scholars and students of development studies, environmental studies, natural resource management, governance, and public administration, particularly those working on water resources in South Asia. They will also be useful for policymakers and governmental and non-governmental organizations. **Clean Water and Sanitation** Walter Leal Filho, Anabela Marisa Azul, Luciana Brandli, Amanda Lange Salvia, Tony Wall, 2022-07-09 The problems related to the process of industrialisation, such as biodiversity depletion, climate change, and a worsening of health and living conditions, especially but not only in developing countries, intensify. Therefore, there is an increasing need to search for integrated solutions to make development more sustainable. The United Nations has acknowledged the problem and approved the 2030 Agenda for Sustainable Development. On 1st January 2016, the 17 Sustainable Development Goals (SDGs) of the Agenda officially came into force. These goals cover the three dimensions of sustainable development: economic growth, social inclusion, and environmental protection. The Encyclopedia of the UN Sustainable Development Goals comprehensively addresses the SDGs in an integrated way. It encompasses 17 volumes, each devoted to one of the 17 SDGs. This volume is dedicated to SDG 6: Ensure availability and sustainable management of water and sanitation for all. Water and sanitation are fundamental to human well-being. Integrated water resources management is essential to ensure availability and sustainable management of water and sanitation for all and to the realization of Sustainable Development. Concretely, the defined targets are: Achieve universal and equitable access to safe and affordable drinking water for all; Achieve access to adequate and equitable sanitation and hygiene for all and end open defecation, paying special attention to the needs of women and girls and those in vulnerable situations; Improve water quality by reducing pollution, eliminating dumping, and minimizing release of hazardous chemicals and materials, halving the proportion of untreated wastewater and substantially increasing recycling.

and safe reuse globally Substantially increase water use efficiency across all sectors and ensure sustainable withdrawals and supply of freshwater to address water scarcity and substantially reduce the number of people suffering from water scarcity Implement integrated water resources management at all levels including through transboundary cooperation as appropriate Protect and restore water related ecosystems including mountains forests wetlands rivers aquifers and lakes Expand international cooperation and capacity building support to developing countries in water and sanitation related activities and programmes including water harvesting desalination water efficiency wastewater treatment recycling and reuse technologies Support and strengthen the participation of local communities in improving Uwater and sanitation management Editorial Board Ulisses M Azeiteiro Anabela Marisa Azul Luciana Brandli Dominique Darmendrail Despo Fatta Kassinos Walter Leal Filho Susan Hegarty Amanda Lange Salvia Albert Llaus s Paula Duarte Lopes Javier Marug n Fernando Morgado Wilkister Nyaora Moturi Karel F Mulder Alesia Dedaa Ofori Sandra Ricart Water Utility Asset Management Asian Development Bank,2014-05-01 Experiences of the Asian Development Bank ADB in the water supply sector show the consequences of inadequate asset management such as lack of customer coverage and high nonrevenue water ratios One response is lending to allow for new infrastructure Some immediate benefits may be evident but sustainability is at risk unless better asset management is part of the solution This guide provides ADB s perspective on asset management as well as an overview of the concept processes and systems of asset management followed by a presentation of case studies about what utilities have done to manage their assets including the results achieved *Report and Recommendation of the President to the Board of Directors on a Proposed Loan to the Democratic Socialist Republic of Sri Lanka for the Urban Development and Low-income Housing (sector) Project* Mitsuo Sato,Asian Development Bank,1998 **Report and Recommendation of the President to the Board of Directors on a Proposed Loan to the Democratic Socialist Republic of Sri Lanka for the Secondary Towns and Rural Community-based Water Supply and Sanitation Project** Tadao Chino,2002 **Diverting the Flow** Margreet Zwarteveen,Sara Ahmed,Suman Rimal Gautam,2014-03-11 Across the South Asian region water determines livelihoods and in some cases even survival However water also creates exclusions Access to water and its social organisation are intimately tied up with power relations This book provides an overview of gender equity and water issues relevant to South Asia The essays empirically illustrate and theoretically argue how gender intersects with other axes of social difference such as class caste ethnicity age and religion to shape water access use and management practices Divided into six thematic sections each of which starts with an introduction of relevant concepts debates and theories the book looks at laws and rights policies technologies and intervention strategies In all the book clearly shows how understanding and changing the use distribution and management of water is conditional upon understanding and accommodating gender relations Published by Zubaan **Technical Assistance (financed from the Japan Special Fund) to the Democratic Socialist Republic of Sri Lanka for Preparing the Secondary Towns Water Supply and Sanitation Project** Asian Development Bank,2000

Tapping the Market A. Nickson, R. Franceys, 2003-08-12 This book examines the challenge of reform of the urban water supply sector in developing countries based on case studies of state owned water companies in Ghana India Sri Lanka and Zimbabwe The growing public private partnership for urban water supply is analyzed focussing on the concession contract model The implications for meeting the water needs of the urban poor for the regulatory role of the state and for state capacity building are also discussed *Water Resources Journal* ,1987 Report and Recommendation of the President to the Board of Directors on a Proposed Loan to the Democratic Socialist Republic of Sri Lanka for the Third Water Supply and Sanitation Sector Project Mitsuo Sato, 1997 **Technical Assistance, Democratic Socialist Republic of Sri Lanka** Asian Development Bank, 2005 *Livelihood Enhancement Through Agriculture, Tourism and Health* Narayan Chandra Jana, Anju Singh, R. B. Singh, 2022-01-18 Agriculture is the backbone of our economic system It provides not only food and raw material but also employment opportunities to a very large number of people Higher atmospheric temperature has an impact on crop yields while the changes in rainfall could affect both crop quality and quantity Climate change therefore could increase the prices of major crops in some regions For the most vulnerable people lower agricultural output means lower income In addition climate change is expected to increase the risk of illness and death from extreme heat and poor air quality Recent evidence is the COVID 19 pandemic Furthermore climate change also affects the occurrence of other infectious diseases A number of well known diseases are climate sensitive malaria dengue fever and cholera among others Tourism is considered as an industry and alternative contributor to a nation's income It can generate employment opportunities and boost up the economy This book consisting of 26 chapters focuses on the issues of agriculture tourism and health for livelihood enhancement It is essential to discuss these diverse issues in the field of geography as it encompasses interdisciplinary topics The range of concerns at the national regional and local levels is not confined to geography only but also involves other disciplines as well Therefore this book is a valuable source for scientists and researchers in allied fields such as livelihood agriculture land use tourism management health care and tribal studies Furthermore this book can be of immense help to the researchers planners and decision makers engaged in solving problems in these areas in developing countries and beyond
