Relative Dating Activity

How can you determine the sequence of past events?

Earth is very old and many of its features were formed before people came along to study them. For that reason, studying Earth now is like detective work—using clues to uncover fascinating stories. The work of geologists and paleontologists is very much like the work of forensic scientists at a crime scene. In all three fields, the ability to put events in their proper order is the key to unraveling the hidden story.

Sequencing events after a thunderstorm

Carefully examine this illustration.

It contains evidence of following events:

1. 5 The baking heat of the sun caused cracks to form in the dried mud puddle.
2. 1 A thunderstorm began.
3. 4 The mud puddle dried.
4. 3 A child ran through the mud puddle.
5. 2 Hailstones fell during the thunderstorm.

From the clues in the illustration, sequence the events listed above in the order in which they happened.

6. Write a brief story that explains the appearance of the dried mud puddle and includes all the events. In your story, justify the order of the events. (4 points)

A storm came, creating the puddle. Then, it started to hail.
Afterwards, a child was playing outside and ran through the
puddle, leaving footprints. The sun dried the puddle, and
eventually the puddle was so dry that it cracked.

Relative Age Dating Activity Answer Key
