Concurrent Engineering Approaches for Sustainable Product Development in a Multi-Disciplinary Environment Josip Stjepandić,Georg Rock,Cees Bil,2012-08-10 The CE Conference series is organized annually by the International Society for Productivity Enhancement

ISPE and constitutes an important forum for international scientific exchange on concurrent and collaborative enterprise engineering. These international conferences attract a significant number of researchers, industrialists and students as well as government representatives who are interested in the recent advances in concurrent engineering research and applications. Concurrent Engineering Approaches for Sustainable Product Development in a Multi-Disciplinary Environment. Proceedings of the 19th ISPE International Conference on Concurrent Engineering contains papers accepted, peer-reviewed and presented at the annual conference held at the University of Applied Sciences in Trier, Germany from 3rd-7th of September 2012. This covers a wide range of cutting-edge topics including Systems Engineering and Innovation Design for Sustainability, Knowledge Engineering and Management, Managing product variety, Product Life Cycle Management and Service Engineering, Value Engineering. Location Theory and Decision Analysis Yupo Chan, 2011-08-26. Employing state-of-the-art quantitative models and case studies, Location Theory and Decision Analysis provides the methodologies behind the siting of such facilities as transportation terminals, warehouses, housing, landfills, state parks and industrial plants. Through its extensive methodological review, the book serves as a primer for more advanced texts on spatial analysis, including the monograph on Location, Transport and Land Use by the same author. Given the rapid changes over the last decade, the Second Edition includes new analytic contributions as well as a software survey of analytics and spatial information technology. While the First Edition served the professional community well, the Second Edition has substantially expanded its emphasis for classroom use of the volume. Extensive pedagogic materials have been added, going from the fundamental principles to open-ended exercises including solutions to selected problems. The text is of value to engineering and business programs that offer courses in Decision and Risk Analysis, Multi-criteria Decision Making and Facility Location and Layout. It should also be of interest to public policy programs that use Geographic Information Systems and satellite imagery to support their analyses.

Cemeteryans Jack W. Plunkett, 2008. Franklin Jack, Marla Thadious and Caitlin: this unlikely group of assorted misfits are the Cemeteryans, a group that will take on any job, no really, we mean any bloody job. Money's a bit tight right now. Trudge through disgusting sewers to battle manatees, massacring mermaids and soggy cultists creep through creepy fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad Mad Scientist, a surly Necromancer, a Banshee's granddaughter and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other or at least quit fighting over the tele privilege schedule long enough to get the job done. Not likely.
