Driver Training for Automated Vehicles Siobhán E. Merriman, Katherine L. Plant, Kirsten M. A. Revell, Neville A. Stanton, 2024-04-30 Since the introduction of Automated Vehicles AVs on roads there have been a number of high profile collisions which have highlighted significant driver challenges These include challenges associated with drivers trust in the automation their

knowledge and awareness of the AV's capabilities and limitations and their reduced situation awareness of the road environment and the vehicle. Solutions are needed to overcome these challenges so that the expected benefits of AVs can be realised. Driver Training for Automated Vehicles: A Systems Approach identifies the training requirements for drivers of AVs and takes a systematic approach to design, develop, implement and evaluate a comprehensive training package to address these requirements. This book explores how training can overcome the driver challenges associated with AVs by improving drivers' mental models, trust in automation, decisions and behaviour when activating a Level 4 AV. It presents a systematic approach to the training lifecycle by first presenting the current state of research into AVs, identifying the challenges and training requirements for drivers of AVs, and then developing and evaluating a training programme to achieve these requirements. This fascinating title highlights the need for drivers to undergo training for AVs and takes us a step closer to this need. It walks readers through a systematic four-step process and provides practical guidance to develop and evaluate an effective training programme. The reader will develop a thorough understanding of the current driver challenges with AVs and the methods and systems to mitigate them through current knowledge and research. This book is an ideal read for practitioners, designers and academics with a professional or research interest in AVs. Its appeal extends to those in the fields of automotive design, Systems Engineering, Human Factors and education and training.

Lemon-Aid Used Cars and Trucks 2012-2013 Phil Edmonston, 2012-05-19 Lemon Aid guides steer the confused and anxious buyer through the economic meltdown, unlike any other car and truck books on the market. U.S. automakers are suddenly awash in profits and South Koreans and Europeans have gained market shares while Honda, Nissan and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon Aid Used Cars and Trucks 2012-2013 has the answers, including more vehicles rated with some redesigned models that don't perform as well as previous iterations, downrated More roof crash worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst beaters on the market. More secret warranties taken from automaker internal service bulletins and memos than ever.
