**Exergetic Aspects of Renewable Energy Systems** Evanthia A. Nanaki,George Xydis,2019-07-31 Energy is essential to all human activities as well as critical to social and economic development Sustainable energy planning encompassing the concept of smart cities has a high potential to significantly contribute to climate change mitigation For improved energy efficiency it is essential to find low carbon solutions for the urban environment The integration and management of energy supply with predominant exploitation of local resources is examined through the fundamental concept of exergy This book can assist in decision making with regard to sustainable energy design both at a national and local level

Solar Powered Charging Infrastructure for Electric Vehicles Larry E. Erickson,Jessica Robinson,Gary Brase,Jackson Cutsor,2016-10-14 The Paris Agreement on Climate Change adopted on December 12 2015 is a voluntary effort to reduce greenhouse gas emissions In order to reach the goals of this agreement there is a need to generate electricity without greenhouse gas emissions and to electrify transportation An infrastructure of SPCSs can help accomplish both of these transitions Globally expenditures associated with the generation transmission and use of electricity are more than one trillion dollars per year Annual transportation expenditures are also more than one trillion dollars per year Almost everyone will be impacted by these changes in transportation solar power generation and smart grid developments The benefits of reducing greenhouse gas emissions will differ with location but all will be impacted This book is about the benefits associated with adding solar panels to parking lots to generate electricity reduce greenhouse gas emissions and provide shade and shelter from rain and snow The electricity can flow into the power grid or be used to charge electric vehicles EVs Solar powered charging stations SPCSs are already in many parking lots in many countries of the world The prices of solar panels have decreased recently and about 30% of the new U S electrical generating capacity in 2015 was from solar energy More than one million EVs are in service in 2016 and there are significant benefits associated with a convenient charging infrastructure of SPCSs to support transportation with electric vehicles Solar Powered Charging Infrastructure for Electric Vehicles A Sustainable Development aims to share information on pathways from our present situation to a world with a more sustainable transportation system with EVs SPCSs a modernized smart power grid with energy storage reduced greenhouse gas emissions and better urban air quality Covering 200 million parking spaces with solar panels can generate about 1 4 of the electricity that was generated in 2014 in the United States Millions of EVs with 20 to 50 kWh of battery storage can help with the transition to wind and solar power generation through owners responding to time of use prices Written for all audiences high school and college teachers and students those in industry and government and those involved in community issues will benefit by learning more about the topics addressed in the book Those working with electrical power and transportation who will be in the middle of the transition will want to learn about all of the

challenges and developments that are addressed here **Optimistic Environmentalist, The** David R. Boyd, 2015-08-01 A hopeful inspiring and honest take on the environment Yes the world faces substantial environmental challenges climate change pollution and extinction But the surprisingly good news is that we have solutions to these problems In the past 50 years a remarkable number of environmental problems have been solved while substantial progress is ongoing on others The Optimistic Environmentalist chronicles these remarkable success stories Endangered species from bald eagles to gray whales pulled back from the precipice of extinction Thousands of new parks protecting billions of hectares of land and water The salvation of the ozone layer vital to life on Earth The exponential growth of renewable energy powered by wind water and sun The race to be the greenest city in the world Remarkable strides in cleaning up the air we breathe and the water we drink The banning of dozens of the world's most toxic chemicals A circular economy where waste is a thing of the past Past successes pave the way for even greater achievements in the future Providing a powerful antidote to environmental despair this book inspires optimism leading readers to take action and exemplifying how change can happen A bright green future is not only possible it's within our grasp
