Toyota Technical Information Manual:

Inside the Mind of Toyota Satoshi Hino,2024-11-01 Winner of a Shingo Research and Professional Publication Award Toyota s sustained growth attracts the attention of economists and industrialists around the world eager to learn the secrets of Toyota s lasting success In Inside the Mind of Toyota Management Principles for Enduring Growth Satoshi Hino examines the source of Toyota s strength the fundamental thinking and management structures that lie beneath the creation of its famed Toyota Production System From the perspective of a professional with 30 years experience in the auto industry Hino presents a fresh and detailed analysis of Toyota s essential management system from its very beginnings into the 21st century The ultimate goal is not simply to mimic Toyota s formula but to learn from it and in doing so surpass it From the Translator s Foreword Unlike most Toyota watchers Hino urges us to set our sights not on replicating Toyota s success but on surpassing it This point is crucial because it moves our attention away from slavish imitation of what is visible on the surface and challenges us to tap into deeper and more powerful mechanisms of excellence This is not a cookbook and it is not Toyota Lite It deserves serious study application and experimentation Learn how Toyota thinks Hino is telling us Learn Toyota s strengths make them your own and then exceed them Andrew Dillon September

Environmental Information in Instructions for Use of

Consumer Products Ari Nissinen, 2005-03-11 The European Union has highlighted the issue of environmentally sound use of products in the context of Integrated Product Policy IPP. Accordingly consumers should have easy access to understandable relevant and credible environmental information. Information about product characteristics is available in different forms and sources but in many cases relevant environmental information is not available on the product itself. The study described in this report was initiated in order to produce information on the state of user instructions regarding environmental information. User manuals of passenger cars and refrigerators were focused on examining the advice which could diminish the harmful environmental effects of the use of these products. Other studied products included such durable products as textiles and furniture as well as such consumables as cleaning chemicals and recyclable paper products. The study raised many ideas about actions that could promote the status and eco development of instructions for use.
