1. The reaction below has reached a state of equilibrium. Write the equilibrium constant expression for this reaction.
2. Consider the following chemical equation: $2\text{H}_2\text{O}(g) \rightleftharpoons 2\text{H}_2(g) + \text{O}_2(g)$. In equilibrium, the concentration of H_2 is 0.02 M, the concentration of H_2O is 0.01 M, and the concentration of O_2 is 0.01 M. Calculate the equilibrium constant, K .
3. At a certain pressure, 10 g of each of the gases, chlorine and hydrogen, were placed in a 100 L container. Calculate the equilibrium constant, K , for the following equation: $\text{H}_2 + \text{Cl}_2 \rightleftharpoons 2\text{HCl}$. At equilibrium, the concentration of each gas was 0.01 M.
4. A 100 mL flask is filled with a gas mixture at a pressure of 1 atm. The flask is sealed and the gas mixture is allowed to reach equilibrium. Calculate the equilibrium constant, K , for the reaction: $\text{H}_2 + \text{Cl}_2 \rightleftharpoons 2\text{HCl}$.
5. Consider the following chemical equation: $\text{PCl}_5(g) \rightleftharpoons \text{PCl}_3(g) + \text{Cl}_2(g)$. At the initial concentration of PCl_5 is 0.10 M, what is the equilibrium concentration of Cl_2 if the concentration of PCl_3 is 0.05 M at equilibrium? The pressure constant, K , is 0.01 M.

Far from Equilibrium: An archaeology of energy, life and humanity Michael J. Boyd, Roger C. P. Doonan, 2021-03-03 Archaeology is in crisis Spatial turns material turns and the ontological turn have directed the discipline away from its hard won battle to find humanity in the past Meanwhile popularised science camouflaged as archaeology produces shock headlines built on ancient DNA that reduce humanity's most intriguing historical problems to two dimensional caricatures Today archaeology finds itself less able than ever to proclaim its relevance to the modern world This volume foregrounds the relevance of the scholarship of John Barrett to this crisis Twenty four writers representing three

generations of archaeologists scrutinise the current turmoil in the discipline and highlight the resolutions that may be found through Barrett's analytical framework Topics include archaeology and the senses the continuing problem of the archaeological record practice discourse and agency reorienting archaeological field practice the question of different expressions of human diversity and material ecologies Understanding archaeology as both a universal and highly specific discipline case studies range from the Aegean to Orkney and encompass Anatolia Korea Romania United Kingdom and the very nature of the Universe itself This critical examination of John Barrett's contribution to archaeology is simultaneously a response to his urgent call to arms to reorient archaeology in the service of humanity *National Science Education Standards* National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, National Committee on Science Education Standards and Assessment, 1996-01-07 Americans agree that our students urgently need better science education But what should they be expected to know and be able to do Can the same expectations be applied across our diverse society These and other fundamental issues are addressed in National Science Education Standards a landmark development effort that reflects the contributions of thousands of teachers scientists science educators and other experts across the country The National Science Education Standards offer a coherent vision of what it means to be scientifically literate describing what all students regardless of background or circumstance should understand and be able to do at different grade levels in various science categories The standards address The exemplary practice of science teaching that provides students with experiences that enable them to achieve scientific literacy Criteria for assessing and analyzing students' attainments in science and the learning opportunities that school science programs afford The nature and design of the school and district science program The support and resources needed for students to learn science These standards reflect the principles that learning science is an inquiry based process that science in schools should reflect the intellectual traditions of contemporary science and that all Americans have a role in improving science education This document will be invaluable to education policymakers school system administrators teacher educators individual teachers and concerned parents **Bulletin of the Atomic Scientists** ,1971-09 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world [Current Index to Journals in Education](#) ,2002 *Zell's Popular Encyclopedia* ,1882 **The American Educator** Daniel Garrison Brinton, Marcus Benjamin, 1897 *Zell's Popular Encyclopedia* Leo de Colange, 1871 **Bulletin of the Atomic Scientists** ,1970-12 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world *Bulletin of the Atomic Scientists* ,1971-09 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project
