*Design Manual* Walter T. Grondzik, 2007 The Air Conditioning Manual assists entry level engineers in the design of air  
conditioning systems It is also usable in conjunction with fundamental HVAC R resource material as a senior or graduate  
level text for a university course in HVAC system design The manual was written to fill the void between theory and practice  
to bridge the gap between real world design practices and the theoretical calculations and analytical procedures or on the  
design of components This second edition represents an update and revision of the manual It now features the use of SI units  
throughout updated references and the editing of many illustrations Helps engineers quickly come up with a design solution  
to a required air conditioning system Includes issues from comfort to cooling load calculations New sections on Green HVAC
