

Organization of a Research Paper:

Introduction

A good introduction is relatively short. It tells why the reader should find the paper interesting, explains why the author carried out the research, and gives the background the reader needs to understand and judge the paper.

Specifically, the Introduction defines the nature and extent of the problems studied, relates the research to previous work (usually by a brief review of the literature clearly relevant to the problem), explains the objectives of investigation, and defines any specialized terms or abbreviations to be used in what follows. Remember that the Introduction leads logically to, and clearly states, the hypothesis or principal theme of the paper.

The Introduction should be relatively brief; most journals recommend less than 500 words. Avoid repetition: do not repeat the Abstract in the Introduction (and Introduction in the Discussion). Do not go into an extensive literature review; two to four most relevant and recent citations should be adequate to corroborate a statement. Do not repeat well-known facts nor state the obvious. For example, it is disappointing that even now, i.e., after more than 30 years of concerted efforts in scientific agroforestry and a large volume of literature in the subject, some manuscripts—and, interestingly, some editors—insist on providing a definition of agroforestry in any article on that subject! The Introduction section also may use different tenses: justification and motivation of the study is presented in present tense ("Soils store relatively large amounts of carbon in terrestrial ecosystems."), whereas the review of literature is presented in past tense ("Studies showed that ..."), or in present perfect tense if it is common knowledge ("Studies have shown that ..."). The objective is written in past tense ("The objective of the current study was ..."). Different journals follow different norms and styles. Some want discussion of literature in the Introduction while some want it in the Discussion section. Some journals require a brief account of the Materials and Methods to be included in the Introduction section, and some may want even the important conclusions presented in the Introduction section, although that tendency is now disappearing.

Sample Research Paper Introduction:

Writing Human Factors Research Papers Don Harris, 2016-12-05 Writing high quality papers suitable for publication within international scientific journals is now an essential skill for all early career researchers their career progression and the reputation of the department in which they work depends upon it However many manuscripts are rejected or sent back for major re working not because the science they contain is in any way bad but because the same problems keep occurring in the way that the material is presented It is one thing to write a good scientific paper however it is quite another thing to get it published This requires some additional nous In writing this book Don Harris draws upon nearly a quarter of a century of experience as an author and reviewer of research papers and ultimately as a journal editor By his own admission it contains all the things he wished that his mentors had told him 25 years ago but didn't The material in the book is drawn from many years of finding all these things out for himself usually by trial and error but mostly error The text adopts a much lighter touch than is normally found in books of this type after all who really wants to read a book about writing research papers The author describes his own unique approach to writing journal papers which in his own words has proved to be extremely successful All major points are illustrated with examples from his own published works The book is written in the form of a manual for constructing a journal manuscript read a chapter write a section However the material it contains goes beyond just this and also describes how to select a target journal the manuscript submission process what referees are looking for in a good journal paper and how to deal with the referees comments Each chapter concludes with a checklist to ensure all the key elements have been addressed

Starting and Finishing the Paper Michael Walters, Ellen Diehl-Matto, 2006-08 Starting and Finishing the Paper A How to Guide to Quality College Papers Second

Edition is an excellent book for college students having difficulties with writing their college papers. It is a fun and step by step approach from start to finish. Starting and Finishing the Paper covers how to start a paper, how to write an introduction, how to handle different assignments, building the body of the paper, plagiarism, proper quoting, paragraph construction, transitions, and writing conclusions. It also contains many writing examples for students to follow. Starting and Finishing the Paper is short and to the point but not short on advice to the college student from two professors of writing who have taught for decades. Inside are many insightful comments written by the authors about the pitfalls students fall into and how to avoid them. It is not only written for students taking their first college composition course but also for students who need to write research papers and literary papers.

English for Writing Research Papers Adrian Wallwork, 2011-04-01. Publishing your research in an international journal is key to your success in academia. This guide is based on a study of referees' reports and letters from journal editors on reasons why papers written by non-native researchers are rejected due to problems with English usage. It draws on English-related errors from around 5000 papers written by non-native authors, 500 abstracts by PhD students, and over 1000 hours of teaching researchers how to write and present research papers. With easy-to-follow rules and tips and with examples taken from published and unpublished papers, you will learn how to prepare and structure a manuscript, increase readability, and reduce the number of mistakes you make in English by writing concisely with no redundancy and no ambiguity. Plan and organize your paper and structure each paragraph and each sentence so that the reader can easily follow the logical build-up towards various conclusions. Write a title and an abstract that will attract attention and be read. Decide what to include in the various parts of the paper: Introduction, Methodology, Discussion, etc. Select from over 700 useful phrases, highlight your claims and contribution, avoid plagiarism, and make it 100% clear whether you are referring to your own work or someone else's. Choose the correct tenses and style: active or passive. Other books in the series: *English for Presentations at International Conferences*, *English for Academic Correspondence*, and *Socializing English for Research Usage*. Style and Grammar, *English for Academic Research Grammar Vocabulary Writing Exercises*. Adrian Wallwork is the author of more than 20 ELT and EAP textbooks. He has trained several thousand PhD students and academics from 35 countries to prepare and give presentations. Since 1984 he has been revising research papers and in 2009 he set up englishforacademics.com, a proofreading and editing service specifically for researchers.

TEXT BOOK OF RESEARCH METHODOLOGY Prof. (Dr.) Mukesh Chandra Sharma, Dr. Prashant Vishnu Ajmire, Dr. Manoj Kumar Katual, Vandana Bhatia, Dr Swati Rana, 2025-01-10

Textbook of Research Methodology is an essential guide for students and researchers providing a comprehensive understanding of research fundamentals. The book is systematically organized into nine chapters covering the foundational aspects of research including its meaning, objectives and motivation along with concepts like theory, empiricism and the scientific method. Readers are introduced to the intricacies of problem identification and hypothesis formulation with detailed explanations of null and alternative hypotheses and the importance of hypothesis testing. The chapter on research design explores various types such as exploratory, descriptive and experimental designs emphasizing their features and applications. Qualitative and quantitative research methodologies are thoroughly explained highlighting key concepts like causality, generalization and replication. The book also delves into measurement techniques addressing challenges in validity, reliability and different levels of measurement such as nominal, ordinal, interval and ratio scales. Sampling techniques are extensively discussed including probability sampling methods like simple random sampling, stratified sampling and multi stage sampling with practical insights on determining sample size and addressing sampling errors. Data analysis is covered with a focus on univariate and bivariate methods such as cross tabulations and chi square tests aiding readers in hypothesis testing and statistical interpretation. The final chapters guide researchers on paper writing, ethical publishing practices and the use of modern tools like reference management software, LaTeX and plagiarism detection tools. This textbook serves as a valuable resource for understanding the research process making it an indispensable companion for academic and professional pursuits.
