client requirements such as structure occupancy vision affordability timing sustainability and quality Precast concrete is one of those materials and has been used from whole frameworks to facades and elements mixed with structural steelwork and cast in place concrete This state of the art report shows how precast concrete can be effectively integrated into tall buildings using modern materials and techniques drawing on the experience and expertise that is currently available in the global precast concrete industry The report is aimed at not only building professionals and students but also at contractors investors owners public bodies and any other parties interested in the possibilities for use of precast concrete in tall building construction Extensive case studies at the end of the Bulletin illustrate the benefits and applications discussed in the earlier chapters NBS Special Publication ,1971 **An Index of U.S. Voluntary Engineering Standards** United States.
