Local Economic and Employment Development (LEED) Designing Local Skills Strategies OECD, 2009-11-16 Drawing from a wide array of case studies this book analyses best practice local strategies for increasing workforce skills And it also takes a close look at the opportunities and challenges presented by international migration

Migration Citizenship Labour Lara Jüssen, 2017-08-22 Lara Jüssen takes the case of Latin American household and construction workers in Madrid to show how irregular labour migrants make citizenship available for themselves through emplacements, embodiments and enactments of citizenship After describing the sociopolitical context of crisis and resistance in Spain citizenship is anthropologized in order to approach it through the workplace, the private household and the construction site Based on empirical results from interviews it is analyzed how citizenship is enacted through ego centered networks and assemblages that situate the migrants' social belonging how it is embodied through carving out of identities of the migrant workers intersectionality of gender, ethnicity and class affects that imprint workers' bodies and experiences of violence at the workplace then citizenships enactment is scrutinized through workers' empowerment for rights individually at the workplace and collectively through demonstrations and political theater performance in urban public space

Services and the Knowledge-Based Economy Mark Boden, Ian Miles, 2019-07-23 First published in 2000 Over the past two decades the service sector has increased dramatically and now occupies the largest share of the economy of advanced industrial societies Certain business services are regularly cited as evidence for the emergence of a knowledge economy In this pioneering book leading researchers in the fields of service industries and innovation studies investigate the reasons for the growth of the service sectors and this emergent knowledge economy Drawing on material as diverse as macroeconomic statistics and firm level case studies the contributors demonstrate that services are often important innovators in their own right as well as contributing to innovation and economic performance in their user industries The question of how far services are special cases and what specific processes and trajectories characterize their innovative activity is treated systematically Additionally a variety of original analyses and information resources are presented This book should be of value to the student of the modern industrial society to those seeking to forge policies appropriate to the new

context of economic development and to researchers who are confronting the challenges of the knowledge economy The Political Economy of Reform Lessons from Pensions, Product Markets and Labour Markets in Ten OECD Countries Tompson William, 2009-08-24 By looking at 20 reform efforts in ten OECD countries this report examines why some reforms are implemented and other languish OECD Reviews on Local Job Creation Employment and Skills Strategies in Israel OECD, 2015-07-27 This report delivers evidence based and practical recommendations on how to better support employment and economic development in Israel **Educational Choice** Bruce W. Wilkinson, Jim Head, Michael Krashinsky, Institute for Research on Public Policy, 1994 *2024-25 All India IAS/PCS General Studies Indian Economy and Social Development* YCT Expert Team , 2024 25 All India IAS PCS General Studies Indian Economy and Social Development 288 595 E This book contains the previous solved papers and 3640 objective questions with certified answer sheet *Statistics and Economics* Richmond Mayo-Smith, 1899 **Gender Equality at Work The Economic Case for More Gender Equality in Estonia** OECD, 2022-12-06 Gender equality is not just about fairness and equity it is also about economic empowerment and economic growth Estonia has made great strides towards gender equality Girls today outperform boys in educational attainment but they are less likely than boys to study mathematics or information and communication technology **Equity and Efficiency in Economic Development** Donald J. Savoie, Irving Brecher, 1992-10-16 The ideological foundations of the contributors range from personalized neo Marxism through extreme centre neo Keynesianism to hard line neoclassical mathematical economics Despite this diversity there is a surprising degree of consensus No contributor advocates centralized planning and none expects a free market to cure all economic ills Opinions vary as to how well the market actually works but all agree that equity and efficiency are essential goals which most consider to be complementary rather than mutually exclusive In the concluding chapter it is suggested that current economic problems are caused not so much by government intervention as by the nature of that intervention The authors believe that the recent ideological convergence may lead to a new paradigm a theory of the optimal blend of market and management that will be flexible enough to deal with the varying conditions of diverse societies thus simplifying the task of creating a smooth running global economy The contributors are Irma Adelman Mark Blaug Kenneth Boulding Irving Brecher Albert Breton John S Chipman Andr Gunder Frank Martha Fuentes Frank Niles Hansen Murray C Kemp Robin Marris Richard Musgrave Walt Rostow Donald J Savoie Nicholas Spulber and Paul Streeten Higgins himself contributes a chapter on basic concepts and collaborates with Donald Savoie on the final chapter Science of Statistics: Statistics and economics Richmond Mayo-Smith, 1899 **African Economic Development** Christopher Cramer, John Sender, Arkebe Oqubay, 2020 This book challenges conventional wisdoms about economic performance and possible policies for economic development in African countries Its starting point is the striking variation in African economic performance Unevenness and inequalities form a central fact of African economic experiences The authors highlight not only differences between countries but also variations within countries differences often organized around distinctions of gender

class and ethnic identity For example neo natal mortality and school dropout have been reduced particularly for some classes of women in some areas of Africa Horticultural and agribusiness exports have grown far more rapidly in some countries than in others These variations and many others point to opportunities for changing performance reducing inequalities learning from other policy experiences and escaping the ties of structure and the legacies of a colonial past The book rejects teleological illusions and Eurocentric prejudice but it does pay close attention to the results of policy in more industrialized parts of the world Seeing the contradictions of capitalism for what they are fundamental and enduring may help policy officials protect themselves against the misleading idea that development can be expected to be a smooth linear process or that it would be were certain impediments suddenly removed The authors criticize a wide range of orthodox and heterodox economists especially for their cavalier attitude to evidence Drawing on their own decades of research and policy experience they combine careful use of available evidence from a range of African countries with political economy insights mainly derived from Kalecki Kaldor and Hirschman to make the policy case for specific types of public sector investment
