

Student Council Secretary Speech

I really enjoy participating in student council and that's why I decided to run for secretary. As most of you know my name is **Carrie Cassareello** and let me tell you why you should vote for me.

I am dedicated to student council. I have attended all the meetings this year. I also contribute time and effort to student council. In my free time at school (in between periods or during my lunch), I made power points for the class cup events, updating my class on what was going on and I kept them involved. The secretary has to keep a record of the minutes during meetings, which means they have to write or take notes on what we discussed in the meeting. I am very organized and I would make sure not to lose any papers or any work I did.

I also consider myself a team player. I play on many sports teams and contribute in many ways. I really enjoy working with other people, it's good to give and receive ideas. Together we can come up with great ideas to help the school and community. Student council is a great way to be involved, it is a great way to get to know and work with new people.

I have been a representative for 2 years, so I have experience and am ready for any challenge, I am ready to work. I am ready to help our community. I would really enjoy being our student council secretary.

I believe I would be the perfect candidate because I am dedicated, I am organized, I am trustworthy and because I am a hard worker.

And don't forget

"Take note, the right vote is Carrie Cassareello for Secretary"

Thank you!

Introduction to Transfer Learning Jindong Wang, Yiqiang Chen, 2023-03-30 Transfer learning is one of the most important technologies in the era of artificial intelligence and deep learning It seeks to leverage existing knowledge by transferring it to another new domain Over the years a number of relevant topics have attracted the interest of the research and application community transfer learning pre training and fine tuning domain adaptation domain generalization and meta learning This book offers a comprehensive tutorial on an overview of transfer learning introducing new researchers in this area to both classic and more recent algorithms Most importantly it takes a student's perspective to introduce all the concepts theories algorithms and applications allowing readers to quickly and easily enter this area Accompanying the book detailed code implementations are provided to better illustrate the core ideas of several important algorithms presenting good examples for practice

Communication Disorders in Multicultural Populations Dolores E. Battle, 2011-11-01 Written by some of the top researchers and clinicians in the field *Communication Disorders in Multicultural Populations* 4th Edition offers an in depth look at the major cultural groups in the U S and the issues concerning their communication development common disorders and treatment options This fourth edition features a wealth of updates and new features including the latest research and added coverage of communication issues in countries such as Australia China Canada and Brazil to give speech language pathology students

and speech language pathologists a balanced and global perspective on the most topical multicultural communication issues of today Comprehensive coverage focuses on a wide variety of cultural and age populations Cutting edge research and data offer up to date discussions based on the latest studies in multiculturalism as it relates to the SLP and AuD professions Diverse panel of expert authors include some of the top researchers and clinicians in the field Additional resources provide a focused listing of print and electronic sources at the end of each chapter to support more in depth study of a particular subject Chapter on international perspectives tackles issues in countries such as Australia Canada China and Brazil to give you a more global understanding of communication disorders The latest statistics from the 2010 U S Census report offers the most current data available Increased content on older adults covers the multicultural issues voice disorders and neurogenic disorders particular to this important demographic Case studies give you practice solving realistic clinical problems Chapter overview and conclusion outline the key information in each chapter and serve as a checklist for content mastery

Phonology and Second Language Acquisition Jette G. Hansen Edwards, Mary L. Zampini, 2008 This volume is a collection of 13 chapters each devoted to a particular issue that is crucial to our understanding of the way learners acquire learn and use an L2 sound system In addition it spans both theory and application in L2 phonology The book is divided into three parts with each section unified by broad thematic content Part I Theoretical Issues and Frameworks in L2 Phonology lays the groundwork for examining L2 phonological acquisition Part II Second Language Speech Perception and Production examines these two aspects of L2 speech in more detail Finally Part III Technology Training and Curriculum bridges the gap between theory and practice Each chapter examines theoretical frameworks major research findings both classic and recent methodological issues and choices for conducting research in a particular area of L2 phonology and major implications of the research findings for more general models of language acquisition and or pedagogy

Deep Learning Techniques Applied to Affective Computing Zhen Cui, Wenming Zheng, 2023-06-14 Affective computing refers to computing that relates to arises from or influences emotions The goal of affective computing is to bridge the gap between humans and machines and ultimately endow machines with emotional intelligence for improving natural human machine interaction In the context of human robot interaction HRI it is hoped that robots can be endowed with human like capabilities of observation interpretation and emotional expression The research on affective computing has recently achieved extensive progress with many fields contributing including neuroscience psychology education medicine behavior sociology and computer science Current research in affective computing concentrates on estimating human emotions through different forms of signals such as speech face text EEG fMRI and many others In neuroscience the neural mechanisms of emotion are explored by combining neuroscience with the psychological study of personality emotion and mood In psychology and philosophy emotion typically includes a subjective conscious experience characterized primarily by psychophysiological expressions biological reactions and mental states The multi disciplinary features of understanding emotion result in the fact

that inferring the emotion of humans is definitely difficult. As a result, a multi-disciplinary approach is required to facilitate the development of affective computing. One of the challenging problems in affective computing is the affective gap, i.e. the inconsistency between the extracted feature representations and subjective emotions. To bridge the affective gap, various hand-crafted features have been widely employed to characterize subjective emotions. However, these hand-crafted features are usually low-level and they may hence not be discriminative enough to depict subjective emotions. To address this issue, the recently emerged deep learning, also called deep neural networks, techniques provide a possible solution. Due to the used multi-layer network structure, deep learning techniques are capable of learning high-level contributing features from a large dataset and have exhibited excellent performance in multiple application domains such as computer vision, signal processing, natural language processing, human-computer interaction, and so on. The goal of this Research Topic is to gather novel contributions on deep learning techniques applied to affective computing across the diverse fields of psychology, machine learning, neuroscience, education, behavior, sociology, and computer science to converge with those active in other research areas such as speech emotion recognition, facial expression recognition, Electroencephalogram (EEG)-based emotion estimation, human physiological signal, heart rate estimation, affective human-robot interaction, multimodal affective computing, etc. We welcome researchers to contribute their original papers as well as review articles to provide works regarding the neural approach from computation to affective computing systems. This Research Topic aims to bring together research including but not limited to Deep learning architectures and algorithms for affective computing tasks such as emotion recognition from speech, face, text, EEG, fMRI, and many others; Explainability of deep Learning algorithms for affective computing; Multi-task learning techniques for emotion, personality, and depression detection, etc.; Novel datasets for affective computing; Applications of affective computing in robots such as emotion-aware human-robot interaction and social robots, etc.

Acquiring Pragmatics Sandrine Zufferey, 2014-11-27 *Acquiring Pragmatics* offers a comprehensive synthesis of state-of-the-art research on the acquisition of pragmatics. It introduces the current topics of research in theoretical pragmatics and explores the issues they raise for language acquisition research and the new experimental designs which have been developed to address them. While each chapter covers each topic in depth, it also places a strong emphasis on the underlying methodological aspects of each issue which will help the reader to develop their own experimental designs. Key topics covered include: The interfaces between pragmatics and language acquisition; The social aspects of pragmatic competence; The cognitive aspects of pragmatic competence; The acquisition of pragmatics in autistic spectrum disorders and second language acquisition. *Acquiring Pragmatics* is key reading for advanced undergraduate and graduate students studying pragmatics and language acquisition.

Acquisition in Interlanguage Pragmatics Anne Barron, 2003 The Longitudinal investigation which provides the basic material for this book consists of a corpus of requests, offers, and refusals of offers elicited from Irish learners of German over a ten-month study abroad period using production questionnaires and a variety of

The relationship between music and language Lutz Jäncke, Traditionally music and language have been treated as different psychological faculties This duality is reflected in older theories about the lateralization of speech and music in that speech functions were thought to be localized on the left and music functions on the right hemisphere But with the advent of modern brain imaging techniques and the improvement of neurophysiological measures to investigate brain functions an entirely new view on the neural and psychological underpinnings of music and speech has evolved The main point of convergence in the findings of these new studies is that music and speech functions have many aspects in common and that several neural modules are similarly involved in speech and music There is also emerging evidence that speech functions can benefit from music functions and vice versa This new research field has accumulated a lot of new information and it is therefore timely to bring together the work of those researchers who have been most visible productive and inspiring in this field and to ask them to present their new work or provide a summary of their laboratory s work

Phonetics and Speech Science Ian R. A. MacKay,2023-05-11 Phonetics is a fundamental building block not just in linguistics but also in fields such as communication disorders However introductions to phonetics can often assume a background in linguistics whilst at the same time overlooking the clinical and scientific aspects of the field This textbook fills this gap by providing a comprehensive yet accessible overview of phonetics that delves into the fundamental science underlying the production of speech Written with beginners in mind it focuses on the anatomy and physiology of speech while at the same time explaining the very basics of phonetics such as the phonemes of English the International Phonetic Alphabet and phonetic transcription systems It presents the sounds of speech as elements of linguistic structure and as the result of complex biological mechanics It explains complicated terminology in a clear easy to understand way and provides examples from a range of languages from disorders of speech and from language learning

Speech Processing for IP Networks David Burke,2007-03-13 Media Resource Control Protocol MRCP is a new IETF protocol providing a key enabling technology that eases the integration of speech technologies into network equipment and accelerates their adoption resulting in exciting and compelling interactive services to be delivered over the telephone MRCP

leverages IP telephony and Web technologies such as SIP HTTP and XML Extensible Markup Language to deliver an open standard vendor independent and versatile interface to speech engines Speech Processing for IP Networks brings these technologies together into a single volume giving the reader a solid technical understanding of the principles of MRCP how it leverages other protocols and specifications for its operation and how it is applied in modern IP based telecommunication networks Focusing on the MRCPv2 standard developed by the IETF SpeechSC Working Group this book will also provide an overview of its precursor MRCPv1 Speech Processing for IP Networks Gives a complete background on the technologies required by MRCP to function including SIP Session Initiation Protocol RTP Real time Transport Protocol and HTTP Hypertext Transfer Protocol Covers relevant W3C data representation formats including Speech Synthesis Markup Language SSML Speech Recognition Grammar Specification SRGS Semantic Interpretation for Speech Recognition SISR and Pronunciation Lexicon Specification PLS Describes VoiceXML the leading approach for programming cutting edge speech applications and a key driver to the development of many of MRCP s features Explains advanced topics such as VoiceXML and MRCP interworking This text will be an invaluable resource for technical managers product managers software developers and technical marketing professionals working for network equipment manufacturers speech engine vendors and network operators Advanced students on computer science and engineering courses will also find this to be a useful guide

Waveform Analysis of Sound Mikio Tohyama, 2015-01-10 What is this sound What does that sound indicate These are two questions frequently heard in daily conversation Sound results from the vibrations of elastic media and in daily life provides informative signals of events happening in the surrounding environment In interpreting auditory sensations the human ear seems particularly good at extracting the signal signatures from sound waves Although exploring auditory processing schemes may be beyond our capabilities source signature analysis is a very attractive area in which signal processing schemes can be developed using mathematical expressions This book is inspired by such processing schemes and is oriented to signature analysis of waveforms Most of the examples in the book are taken from data of sound and vibrations however the methods and theories are mostly formulated using mathematical expressions rather than by acoustical interpretation This book might therefore be attractive and informative for scientists engineers researchers and graduate students who are interested in the mathematical representation of signals and the applications of Fourier analysis The book can be described as being practically self contained but does assume readers are familiar with introductory topics in discrete signal processing as in the discrete Fourier transform Hence this book might be also usable as a textbook in graduate courses in applied mathematics on topics such as complex functions Almost all scientific phenomena are sensed as waves propagating in some space Over the years waveform analysis has therefore been one of the resilient academic areas of study and still is seen as fertile ground for development In particular waveform analysis based on the theory of linear systems would be a good example where a physical interpretation can be given to the mathematical theory of complex functions in terms of magnitude angle poles and zeros of complex functions For readers who are interested in the physical aspects of sound and vibration data or elementary formulation of wave equations and their solutions the book *Sound and Signals* by M Tohyama Springer 2011 is recommended It can serve as a complementary companion to this present volume or independently as a good reference

Transfer Speech Example Introduction

In the digital age, access to information has become easier than ever before. The ability to download Transfer Speech Example has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Transfer Speech Example has opened up a world of possibilities. Downloading Transfer Speech Example provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Transfer Speech Example has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Transfer Speech Example. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Transfer Speech Example. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Transfer Speech Example, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Transfer Speech Example has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
