Emerging Perspectives from Social Realism on Knowledge and Education Graham McPhail, Richard Pountney, Leesa Wheelahan, 2024-10-28 This book brings the key ideas and concepts of social realism to bear on current debates in the fields of knowledge and curriculum. The key concern of this collection is to highlight matters related to knowledge and the influence these dimensions have on the formation of curricula, pedagogy, identity and equity in educational contexts. Presenting new perspectives on the place of various types and forms of knowledge in contemporary education, this book explores two central questions: what type of knowledge is most important to include in a curriculum and what is meant by disciplinary knowledge. The chapters use empirical examples to illustrate how the issues play out on a global stage, interweaving the social justice concern of equitable access to disciplinary knowledge throughout. In particular, the authors address the emerging theorisation of issues related to the decolonisation of curricula, the recontextualisation of non-traditional knowledge into the curriculum and teacher education. Offering new philosophical and theoretical perspectives, this book will be of interest to researchers, scholars and students examining the fields of knowledge and curriculum and the sociology of education more broadly.

Concept-Based Inquiry in Action Carla Marschall, Rachel French, 2018-05-30 This is exactly what my school needs right now to support colleagues to build on the foundations of our written concept-based curriculum and to take off our taught curriculum to the next and highest levels. Neville Kirton, Deputy Head of Secondary, Colegio Anglo Colombiano, Bogota, Colombia. Filled with strategies, illustrations, diagrams and pictures, this book really gives you the insight you need to help students better understand what they are learning. So many great ideas that can be used in any classroom. A must read for all educators. Amanda McKee, 9th Algebra Geometry Secondary Certified Instructor Mentor, Johnsonville High School, Johnsonville, SC. Create a thinking classroom that helps students move from the factual to the conceptual. All students deserve the opportunity to think conceptually. But seeing conceptual relationships does not come naturally to every student. How can teachers construct thinking classrooms where students can move from the factual to the conceptual level of thinking? Concept-Based Inquiry in Action has the answers. In this book, the authors marry theory with practice to create a new framework for inquiry that promotes deep understanding. Concept-Based Inquiry. The key is helping students to inquire into concepts and the relationships between them using guiding questions developed by the teacher, the students themselves or by the teacher and students together. Step by step, the authors lead both new and experienced educators to implement teaching strategies that support the realization of inquiry-based learning for understanding in any K-12 classroom. The book and its accompanying website are rich with the resources necessary to facilitate the construction and transfer of conceptual understanding, including numerous practical teaching strategies aligned to each phase of Concept-Based Inquiry that can be modified for diverse populations. Visual notes that represent significant ideas discussed within each chapter. Videos of instructional strategies and teacher interviews that show Concept-Based Inquiry in action in K-12 classrooms around the world. Templates
