Policy Making and Southern Distinctiveness John C. Morris,Martin K. Mayer,Robert C. Kenter,R. Bruce Anderson,2021-09-12 Policy Making and Southern Distinctiveness examines the uniqueness of southern politics and their policy choices While decades of scholarship on the politics of the American South have focused on partisanship and electoral outcomes as the primary elements of interest in southern politics few works have focused on the more practical outcomes of these political processes specifically comparing state policy choices of southern states to non southern states This book examines six different policy arenas voting access gun control health care reproductive rights water and COVID 19 pandemic response comparing policy choices in states in the South with states in the non South The authors find that the South is distinct in several but not all of the policy arenas examined They conclude that the South as a region is unique because of the exceptional degree of one party control evident in the South coupled with a long standing preoccupation with partisanship and race based politics Policy Making and Southern Distinctiveness provides valuable insights into how and why states behave in the manner they do and where southern states may diverge from the rest of the country It will be of interest to scholars of southern politics state comparative policy public policy American politics and federalism intergovernmental relations

The Heller Case Alan Korwin, David B. Kopel, 2008 *American Guardian*, 1999 **Traveler's Guide to Personal Security** Sam Rosenberg, 2012-08-30 Its good to have a lifeguard but its better to know how to swim Most of us can still remember a time when the most a traveler had to worry about was communicating with the cab driver or knowing when and whom to tip Sadly that age of innocence is long past The globalization of crime and terrorism didnt begin of course with 9 11 but theres no question that the risks and uncertainties of travel and all areas of personal security loom far larger in its wake Not only are longer lines at airport security a fact of life for most travelers but we also experience greater anxiety about the people we encounter and the situations in which we find ourselves The main goal of this guide is to replace this anxiety much of which is likely unfounded with a realistic understanding of what people and situations are and are not likely to pose a risk to your security and well being while traveling domestically or abroad In its pages you'll find most of the common situations in which you may be placed at risk and learn how to spot the warning signals of an impending attack or crime and more importantly what to do about it
