in the security industry and awareness of common terms will be helpful Chlorinated Solvent Source Zone Remediation Bernard H. Kueper, Hans F. Stroo, Catherine M. Vogel, C. Herb Ward, 2014-04-22 The purpose of this book is to help engineers and scientists better understand dense nonaqueous phase liquid DNAPL contamination of groundwater and the methods and technology used for characterization and remediation Remediation of DNAPL source zones is very difficult and controversial and must be based on state of the art knowledge of the behavior transport and fate of nonaqueous phase liquids in the subsurface and site specific geology chemistry and hydrology This volume is focused on the characterization and remediation of nonaqueous phase chlorinated solvents and it is hoped that mid level engineers and scientists will find this book helpful in understanding the current state of practice of DNAPL source zone management and remediation **The Handbook of Transnational Governance** Thomas Hale, David Held, 2018-02-12 When we speak of global governance today we no longer mean simply state to state diplomacy international treaties or intergovernmental organizations like the United Nations Alongside these traditional elements of global politics are a host of new institutions ranging from global networks of governmental officials to private codes of conduct for corporations to action oriented partnerships of NGOs governments corporations and other actors These innovative mechanisms offer intriguing solutions to pressing transnational challenges as diverse as climate change financial governance workers rights and public health But they also raise new questions about the effectiveness and legitimacy of transnational governance An expanding body of scholarship has sought to identify and assess these new forms of governance but this young body of work has lacked a sense of the larger picture This volume seeks to fill that need by presenting a comprehensive overview of new forms of transnational governance This resource is essential for those who want to explain why transborder governance has changed and to understand what implications these changes have for global politics **In Situ Remediation of Chlorinated Solvent Plumes** Hans F. Stroo, C. Herb Ward, 2010-09-10 In the late 1970s and early 1980s our nation began to grapple with the legacy of past disposal practices for toxic chemicals With the passage in 1980 of the Comprehensive Environmental Response Compensation and Liability Act CERCLA commonly known as Superfund it became the law of the land to remediate these sites The U S Department of Defense DoD the nation's largest industrial organization also recognized that it too had a legacy of contaminated sites Historic operations at Army Navy Air Force and Marine Corps facilities ranges manufacturing sites shipyards and depots had resulted in widespread contamination of soil groundwater and sediment While Superfund began in 1980 to focus on remediation of heavily contaminated sites largely abandoned or neglected by the private sector the DoD had already initiated its Installation Restoration Program in the mid 1970s In 1984 the DoD began the Defense Environmental Restoration Program DERP for contaminated site assessment and remediation Two years later the U S Congress codified the DERP and directed the Secretary of Defense to carry out a concurrent program of research development and demonstration of innovative remediation technologies As chronicled in the 1994 National Research Council report Ranking Hazardous Waste Sites for

Remedial Action our early estimates on the cost and suitability of existing technologies for cleaning up contaminated sites were wildly optimistic Original estimates in 1980 projected an average Superfund cleanup cost of a mere 3
