Kane,Julie A. Barta,Ronald E. Myers,Nathaniel R. Evans III,2023-08-24 This book is a comprehensive guide to lung cancer screening for clinicians healthcare systems community leaders and public health officials with the hope of creating a more equitable landscape in both lung cancer screening and lung cancer related outcomes at local state and national levels Authors take a new approach to primary and secondary lung cancer prevention that is in the early stages of adoption in the United States The last decade ushered in recognition of screening as an effective intervention but unfortunately despite the wide acceptance of the importance of this new screening modality nationally not more than 5% of eligible subjects have undergone screening to date in the United States although in some states uptake has reached as high as 16% As is common with any new preventive cancer screening racial and socioeconomic disparities emerge in utilization stage at diagnosis and mortality Over time these disparities decline but consequential differences endure Therefore it is critical to establish equitable screening practices The true measure of the effectiveness of any lung cancer screening program needs to be viewed through the lens of its impact on populations including those most affected by the morbidity and mortality of smoking related illness and lung cancer As such this book emphasizes a number of important public health topics including community outreach to vulnerable populations social justice issues addressing stigma and fatalism in the general community and the use of geocoding to assess a program s impact at a population level This book

weaves traditional topics related to lung cancer screening such as promoting initial and repeat screening interpreting Lung RADs and managing the follow up of findings into the population perspective in order to present a unified comprehensive approach to the subject Further it serves as a guide that health systems health care professionals community leaders and other stakeholders can use to achieve the promise of lung cancer screening *Psychopathology* Louis G.

Don't Tell the Boss! Dmitry Chernov, Didier Sornette, Giovanni Sansavini, Ali Ayoub, 2023-01-20 After a major disaster when investigators are piecing together the story of what happened a striking fact often emerges before disaster struck some people in the organization involved were aware of dangerous conditions that had the potential to escalate to a critical level But for a variety of reasons this crucial information did not reach decision makers So the organization moved ever closer to catastrophe effectively unaware of the possible threat despite the fact that some of its employees could see it coming What is the problem with communication about risk in an organization and why does this problem exist What stops people in organizations or project teams from freely reporting and discussing critical risks This book seeks to answer these questions starting from a deep analysis of 20 disasters where the concealment of risks played a major part These case studies are drawn from around the world and span a range of industries civil nuclear power coal oil

and gas production hydropower energy metals and mining space exploration transport finance retail manufacturing and even the response of governments to wars famines and epidemics Together case studies give an insight into why people hesitate to report risks and even when they do why their superiors often prefer to ignore the news The book reviews existing research on the challenges of voice and silence in organizations This helps to explain more generally why people dread passing on bad news to others and why in the workplace they prefer to keep quiet about unpleasant facts or potential risks when they are talking to superiors and colleagues The discussion section of the book includes important examples of concealment within the Chinese state hierarchy as well as by leading epidemiologists and governments in the West during the novel coronavirus outbreak in Wuhan in 2019 2020 The full picture of the very early stage of the COVID 19 pandemic remains unclear and further research is obviously needed to better understand what motivated some municipal provincial and national officials in China as well as Western counterparts to obfuscate facts in their internal communications about many issues associated with the outbreak
