Empress of the Nile Lynne Olson, 2023-02-28 New York Times Book Review Editors Choice The remarkable story of the intrepid French archaeologist who led the international effort to save ancient Egyptian temples from the floodwaters of the Aswan Dam by the New York Times bestselling author of *Madame Fourcade's Secret War* A female version of the Indiana Jones story Christiane Desroches Noblecourt was a daredevil whose real life antics put Hollywood fiction to shame The Guardian In the 1960s the world's attention was focused on a nail biting race against time the international campaign to save a dozen ancient Egyptian temples from drowning in the floodwaters of the gigantic new Aswan High Dam But the coverage of this unprecedented rescue effort completely overlooked the daring French archaeologist who made it all happen Without the intervention of Christiane Desroches Noblecourt the temples including the Temple of Dendur now at New York's Metropolitan Museum of Art would currently be at the bottom of a vast reservoir It was an unimaginably complex project that required the fragile sandstone temples to be dismantled and rebuilt on higher ground Willful and determined Desroches Noblecourt refused to be cowed by anyone or anything As a member of the French Resistance in World War II she survived imprisonment by the Nazis in her fight to save the temples she defied two of the most daunting leaders of the postwar world Egypt's President Abdel Nasser and France's President Charles de Gaulle As she told one reporter You don't get anywhere without a fight you know Desroches Noblecourt also received help from a surprising source Jacqueline Kennedy America's new First Lady persuaded her husband to help fund the rescue effort After a century and a half of Western plunder of Egypt's ancient monuments Desroches Noblecourt helped instead to preserve a crucial part of that cultural heritage **The**

Benedito,2021-05-18 Phosphate is an essential mineral to all plants and its availability in soils is an increasing challenge for agriculture Phosphate is abundant in soils but its biological availability is often low due to the complexes that it forms with soil minerals and compounds The biological availability of Phosphate is further reduced in acidic soils which represent approximately 40% of earth s arable agricultural lands Agricultural systems compensate Phosphate deficiency with fertilizers coming from the mining of rock phosphate which is estimated to exhaust within the next 50 years For these reasons Phosphate limitations in natural and agricultural ecosystems is going to become a global problem and we urgently need to better understand how plants respond to Phosphate deficiency

The Authoritarian International Stephen G. F. Hall,2023-05-25 Stephen Hall argues that democracies can preserve their norms and values from increasing attacks and backsliding by better understanding how authoritarian regimes learn He focuses on the post Soviet region investigating two established authoritarian regimes Belarus and Russia and two hybrid regimes Moldova and Ukraine with the aim of explaining the concept of authoritarian learning and revealing the practices that are developed and the sources of that learning Hall finds clear signs of collaboration between countries in developing best survival practices between authoritarian minded elites and demonstrates that learning does not just occur between states rather it can happen at the intra state level with elites learning lessons from previous regimes in their own countries He highlights the horizontal nature of this learning with authoritarian minded elites developing methods from a range of sources to ascertain the best practices for survival Post Soviet regional organisations are crucial for the development and sharing of these survival practices as they provide learning rooms and training exercises
