Cooperative Management Daniel Côté, During the last two decades companies were and still are looking for new sources of efficiency while most industries have reached stages of maturity and saturation Moreover internationally available information and communication systems at near zero transaction costs are leading to intensified interactions between customers and between customers and firms As for cooperatives they are experiencing not only the impacts of market transformation but also pressure on the relevance of their own identity In this book two theoretical models are developed a new cooperative paradigm NPC and a cooperative equilibrium model The combination of these two models highlights the potential competitive advantages of the cooperative organization in response to the transformations mentioned In relation to the NPC the strategies selected are 1 value congruence 2 psychological ownership 3 loyalty and customer engagement and 4 value co creation For each of these strategies three key questions are addressed First what are the competitive advantages associated with them regardless of the organizational form Second how do the foundations of the cooperative distinction converge with the essential parameters to be mastered to design implement and operationalize these strategies Finally what are the unique sustainable competitive advantages of a cooperative organization relative to these same strategies Furthermore for the logic of action specific to the cooperative management method to be expressed the cooperative values principles and rules must be articulated in an appropriate management framework This is what the cooperative balance model proposes The last key idea introduced in this book concerns the denaturalizing tendency observed among many cooperatives which leads to an identity crisis The two theoretical models cited are highly relevant to the challenges resulting from this denaturalizing tendency The three models introduced constitute the first part of this book The second part offers a practical perspective while several cases of cooperatives are included <http://coopmanagement.ca>
