

SAMPLE PERSONAL STATEMENT FOR OPTOMETRY SCHOOL

Without my glasses, I would be considered legally blind. I know firsthand the power of corrective eyewear and how it has allowed me to pursue my goals in life, including attending college and completing my training in the natural sciences in order to pursue a career in the healthcare field. It was during my biology, chemistry, and physics courses that I became interested specifically in conditions that impact the eye, and how these conditions can affect vision. I hope to be able to continue my studies in corrective vision through my time in Optometry School, where I will receive the training I will need to serve the vision needs of the community.

Throughout college, I sought to further explore the field of Optometry, and spent several years conducting research on the subject. Through models of animal retinas, I was able to track changes over time on the lens and the retinal aperture in a model of induced glaucoma. The goal was to use this research in order to develop better diagnostic and predictive tools for glaucoma patients. As an aspiring optometrist, I know that this experience has familiarized me with the intricate structures of the eye and the subtle changes seen during disease progression.

During optometry school, I hope to continue to hone and develop my current skills, adding on new knowledge that will help advance my studies. I also hope to be able to gain practical skills performing vision examinations and analyzing their results, as well as prescribing the adequate corrective eyewear. Through careful and detail-oriented examinations, I will be able to help patients detect early signs of disease and enable them to get treatment in a timely manner. These skills will allow me to promote better eye health in the community, leading to improved quality of life.
