An Introduction to Modern Econometrics Using Stata Christopher F. Baum, 2006-08-17 Integrating a contemporary approach to econometrics with the powerful

computational tools offered by Stata this introduction illustrates how to apply econometric theories used in modern empirical research using Stata The author emphasizes the role of method of moments estimators hypothesis testing and specification analysis and provides practical examples that show how to apply the theories to real data sets The book first builds familiarity with the basic skills needed to work with econometric data in Stata before delving into the core topics which range from the multiple linear regression model to instrumental variables estimation

Limitations of contract farming as a pro-poor strategy: The case of maize outgrower schemes in upper West Ghana Ragasa, Catherine, Lambrecht, Isabel, Kufoalor, Doreen S., 2017-03-30 The focus in this paper is on two relatively large maize based contract farming CF schemes with fixed input packages Masara and Akate and a number of smaller and more flexible CF schemes in a remote region in Ghana Upper West Results show that these schemes led to improved technology adoption and yield increases In addition a subset of maize farmers with high yield improvements due to CF participation had high gross margins However on average yields were not high enough to compensate for higher input requirements and cost of capital On average households harvest 29 30 bags 100 kg each or 2 9 3 0 metric tons of maize per hectare and the required repayment for fertilizer seed herbicide and materials provided under the average CF scheme is 21 25 bags 50 kg each per acre or 2 6 3 0 tons per hectare which leaves almost none for home consumption or for sale Despite higher yields the costs to produce 1 ton of maize under CF schemes remain high on average higher than on maize farms without CF schemes more than twice that of several countries in Africa and more than seven times higher than that of major maize exporting countries the United States Brazil and Argentina Sustainability of these CF schemes will depend on from the firms perspective minimizing the costs to run and monitor them and from the farmers perspective developing and promoting much improved varieties and technologies that may lead to a jump in yields and gross margins to compensate for the high cost of credit
