**International Law** Carlo Focarelli, 2019 International Law provides a comprehensive theoretical examination of the key areas of international law. In addition to classic cases and materials, Carlo Focarelli addresses the latest relevant international practice to illustrate contemporary themes and trends in international law and to examine its most topical challenges.

**British Somaliland** Brock Millman, 2013-12-04 British Somaliland provides a history of the administration of the British Somaliland Protectorate from the time when Somaliland first became governable following the defeat of Abdullah Hassan to independence. Describing the interplay between general imperial policies and greater realities and developments in Somaliland, the focus of the book remains on the mechanism by which the Protectorate was operated. The regime that developed was in the end a highly autocratic despotism, generally benign but occasionally predatory. Independence, when it arrived, was in retrospect a tragedy. Somaliland was absorbed into Somalia and a governmental style which suited the conditions of the Protectorate was dissolved into something very different. Since the collapse of Somalia, re-emergent Somaliland appears to be attempting to re-connect to a past remembered as something of a golden age. Highly topical as Somaliland is re-emerging, this book is an invaluable resource for students and scholars of African History, Imperial History, and British History.

**Transnational Communication and Identity Construction in Diaspora** Merga Yonas Bula, 2023-12-14. The study was sparked by the absence of literature on transnational mass personal communication (TMPC) of Eritrean, Ethiopian, Oromo, and Somali diaspora communities. To bridge this theoretical gap, an empirical study was conducted at the meso level based on three questions: a) what topics do people in the diaspora communities discuss in relation to their homelands via social media; an alternative for TMPC; b) how do they communicate about their homelands issues in relation to their collective identities; and c) how does this communication enable the construction of their own identity as well as the deconstruction of competing identities. The theoretical analysis from the perspective of these questions led to developing a new model, i.e., the Diasporic Identity Construction in Transnational Mass Personal Communication Model (DICTMCM). This model, which connects the theoretical analysis to the empirical study, argues that their communication in relation to their homelands, particularly about their collective identities, consists not only of what they talk but also of how

they converse As a result the empirical results delivered a comparative analysis of the tmc of these four diaspora communities and how they construct their collective identities via this tmc which bridged the above stated gap *Racism and Anti-Racism in Canada* David Este,2020-07-10T00:00:00Z Multiculturalism is regarded as a key feature of Canada s national identity Yet despite an increasingly diverse population racialized Canadians are systematically excluded from full participation in society through personal and structural forms of racism and discrimination *Race and Anti Racism in Canada* provides readers with a critical examination of how racism permeates Canadian society and articulates the complex ways to bring about equity and inclusion both individual and systemically *United Nations Documents Index* United Nations.
