multiplicity of potential expressions and outward representations of trans identity as a prelude to the ethnography ze conducted with nine trans collegians that richly documents their interactions with and responses to environments ranging from the unwittingly offensive to explicitly antagonistic The book concludes by giving space to the study s participants to themselves share what they want college faculty staff and students to know about their lived experiences Two appendices respectively provide a glossary of vocabulary and terms to address commonly asked questions and a description of the study design offered as guide for others considering working alongside marginalized population in a manner that foregrounds ethics care and reciprocity

Seeking Integrity in Teacher Education Ann Katherine Schulte, 2008-11-01 In this book a teacher educator examines her practice as a way of learning about teaching as well as challenging teacher education It is about how one teacher educator sought to transform the perspectives of her student teachers in order to better prepare them to teach diverse populations of students while challenging her own beliefs about how best to do that The author seeks integrity in her practice defined as her ability to enact what she teaches preservice teachers to do In particular this book is a self study that contributes to understanding the broader question How much can one affect and change the discourse within education when one also inhabits the characteristics that are privileged by the institution The teacher education literature supports the need to study this type of self reflection Other researchers have pointed out that the role of teacher educators cultural identities in reforming education has been largely ignored in the literature This book offers a unique perspective on the analogous relationship involved when a teacher educator teaches teachers how to examine the impact of their own identities on their teaching while examining that herself
