Transition and Economics Gérard Roland, 2000 The transition from socialism to capitalism in former socialist economies has transformed the economic structure This book provides an overview of research on the issues raised by the shift from collective to private ownership Political Economy of Transition and Development Nauro F. Campos, Jan Fidrmuc, 2003-11-30 Political Economy of Transition and Development collects the proceedings of an international conference that brought the leading thinkers in this field to the Center for European Integration Studies of the University of Bonn in May 2002 The contributions analyze the various interactions between institutions policy choices economic developments and political outcomes in transition and developing countries The first five chapters give a relatively broad assessment of the various reform paths and outcomes in the transition and developing countries The remaining eight chapters proceed to analyze important aspects of transition such as voting behavior political regime choice corruption social capital growth and inequality and EU enlargement The resulting volume thus combines a bird's eye perspective with a relatively narrow focus on selected key issues pertaining to the ongoing transition process in Central and Eastern Europe **Labor Markets and Social Policy in Central and Eastern Europe** N. A. Barr, 2005-01-01 Labor Markets and Social Policy in Central and Eastern Europe summarises social policy reform during the transition and EU accession and analyses the social policy challenges which continue to face both old and new member states Specifically the book amplifies two sets of arguments First social policy under communism was in important respects well suited to the old order and precisely for that reason was systematically badly suited to a market economy Strategic reform directions thus followed from the nature of the transition process and from constraints imposed by EU accession Secondly successful accession is not the end of the story economic and social trends over the past 50 years are creating strains for social policy which all countries old and new members will have to face This book will be of interest to readers interested in social policy particularly those with an interest in the process of post communist transition in EU accession and in future social policy challenges for the wider Europe It should be of interest to academics in departments of economics social policy and political science and to policy makers including government advisers and civil servants Two Roads Diverge Christopher Hartwell, 2016-09-26 This book compares the economic outcomes of Poland and Ukraine by focusing on political and economic institutions **Global Development and Poverty Reduction** John-ren Chen, David Sapsford, 2005-01-01 Explores the various ways in which the institutions of the global economy might rise to the challenges posed by the twin goals of increasing the pace of global development and alleviating poverty This book also provides a much needed analysis of the successes and failures of international institutions in achieving these aims The Labour Market Impact of the EU Enlargement Floro Ernesto Caroleo, Francesco Pastore, 2010-03-18 Floro Ernesto Caroleo and Francesco Pastore This book was conceived to collect selected essays presented at the session on The Labour Market Impact of the European Union Enlargements A New Regional Geography of

Europe of the XXII Conference of the Italian Association of Labour Economics AIEL The session aimed to stimulate the debate on the continuity fracture of regional patterns of development and employment in old and new European Union EU regions In particular we asked whether and how different the causes of emergence and the evolution of regional imbalances in the new EU members of Central and Eastern Europe CEE are compared to those in the old EU members Several contributions in this book suggest that a factor common to all backward regions often neglected in the literature is to be found in their higher than average degree of structural change or more precisely in the hardship they experience in coping with the process of structural change typical of all advanced economies In the new EU members of CEE structural change is still a consequence of the continuing process of transition from central planning to a market economy but also of what Fabrizio et al 2009 call the second transition namely that related to the run up to and entry in the EU

Progress in Economics Research Albert Tavidze, 2003 This series spans the globe presenting leading research in economics Perhaps it is a sign of the times that economic weapons such as sanctions seem to be as powerful as or more so than tanks International applications and examples of economic progress are invaluable in a troubled world with economic booms bursting like so many penny balloons Intraindustry Trade Inequality Human Capital and Trade Theory and Evidence Estimation of Duration Models in the Presence of Heterogeneity of Unknown Form Health and the Process of Economic Development Monetary Volatility and the Paper Bill Spread Habits and Meaning in Alfred Schutz's Action Theory Tax Evasion in a Transition Economy Theory and Empirical Evidence from the Former Soviet Union Republic of Moldova A Tale of Three Cities Is an Electronic Public Order Book Appropriate for Transition Economies Auditors Actuaries and Managed Earnings Using Principal Component Analysis to Explain Term Structure Movements Performance and Stability Index

Markets in the Name of Socialism Johanna Bockman, 2011-07-26 The worldwide spread of neoliberalism has transformed economies politics and societies everywhere In conventional accounts American and Western European economists such as Milton Friedman and Friedrich von Hayek sold neoliberalism by popularizing their free market ideas and radical criticisms of the state Rather than focusing on the agency of a few prominent conservative economists *Markets in the Name of Socialism* reveals a dialogue among many economists on both sides of the Iron Curtain about democracy socialism and markets These discussions led to the transformations of 1989 and unintentionally the rise of neoliberalism This book takes a truly transnational look at economists professional outlook over 100 years across the capitalist West and the socialist East Clearly translating complicated economic ideas and neoliberal theories it presents a significant reinterpretation of Cold War history the fall of communism and the rise of today's dominant economic ideology

The New Comparative Economics Simeon Djankov, 2003 Abstract In recent years comparative economics experienced a revival with a new focus on comparing capitalist economies The theme of the new research is that institutions exert a profound influence on economic development The authors argue that to understand capitalist institutions one needs to understand the basic tradeoff between the costs of

disorder and those of dictatorship They then apply this logic to study the structure of efficient institutions the consequences of colonial transplantation and the politics of institutional choice This paper a product of the Private Sector Advisory Department Private Sector Development Vice Presidency is part of a larger effort to understand institutional differences in the regulation of business

The Routledge Handbook of Comparative Economic Systems Bruno Dallago, Sara Casagrande, 2022-12-19 The Routledge Handbook of Comparative Economic Systems examines the institutional bases of economies and the different ways in which economic activity can function be organized and governed It examines the complexity of this academic and research field assessing the place of comparative economic studies within economics paying due attention to future perspectives and presenting critically important questions analytical methods and relative approaches This complements the recent revival of the systemic view of economic governance which was accelerated by the COVID 19 pandemic and likely even more the renewed East West clash epitomized by the Russian invasion of Ukraine and the West's reaction to it The Handbook is divided into five parts Each part deals with an issue of relevance for the discipline The first and second parts look at the subject content and approach of the discipline and its comparative method The third part looks at the idiosyncratic nature of different economic systems and their constituent elements The fourth part considers the outcomes that different economic systems generate and how these outcomes change following the evolution and transformation of economic systems The last part takes stock and looks ahead at the challenges from a theoretical and applied perspective and the exogenous and endogenous factors promoting the advancement of the discipline including the interaction between and competition among varied approaches and opposing paradigms The Handbook brings together leading international contributors to reflect on the relevant debates and case or country studies provides a balanced overview of the results achieved and current knowledge as well as evolving issues and new fields of research The book provides researchers students and analysts with a complete critical and forward looking presentation and analysis of the content development challenges and perspectives of comparative economic studies Chapters 4 and 22 of this book are available for free in PDF format as Open Access from the individual product page at www.routledge.com Chapter 4 has been made available under a Creative Commons Attribution 4.0 license and Chapter 22 has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
