Transitions To Sustainability Theoretical Debates For A Changing Planet:

Transitions to Sustainability David Humphreys, Spencer S. Stober, 2014-10 The Overlooked Pillar Alisa V. Moldavanova, 2024-08-01 Offering an original perspective on the sustainable development discourse by emphasizing the importance of culture and cultural institutions in facilitating societal sustainability goals The Overlooked Pillar conceptualizes sustainability as an institutional logic that develops in organizations and is enacted by managers of such organizations who make decisions and engage in sustainable thinking on a daily basis leading them to reconcile current organizational realities and the need to adapt to those realities with considerations of the needs of future generations Drawing on more than five years of research conducted on a variety of organizations within the domain of the arts and humanities Alisa V Moldavanova provides a framework for organizational sustainability based on the dynamic interplay of two narratives institutional resilience and institutional distinctiveness and identifies mechanisms and strategies adopted by managers of cultural organizations that maintain and enhance intergenerational sustainability The broader intellectual implication of the insights offered here encompasses the critical notion that genuine long term sustainability the kind that secures the rights of future generations requires sustainable stewardship today Smart Water Management Henning Bjornlund, Stephanie Kuisma, James E. Nickum, Raya Marina Stephan, 2023-05-22 This book contributes to the debate about the suitability and challenges of the Smart Water Management SWM approach Smart Water Management has increasingly been promoted to manage water and wastewater more efficiently and cost effectively by industries and utilities in urban contexts at regional or city scales while reducing overall consumption It is based on the use of Information and Communication Technology ICT to provide real time automated data to resolve water challenges Many of these technologies are complex and costly however and the approach tends to overlook cheaper and less high tech softer approaches to address the same problems Yet there may be opportunities for using them even in resource short rural communities in developing countries The book includes examples of SWM systems in practice in diverse locations from Korea Mexico Paris the Canary Islands and southern Africa aimed at addressing a diverse set of problems including monitoring water supply to refugees Critical voices highlight the need for smart institutions to accompany smart technologies the absurdity of applying SWM to dysfunctional legacy infrastructure systems whether its adoption raises moral hazards and whether SWM is the latest example of hegemonic masculinity in water management The chapters in this book were originally published in Water International *Impact of Meat Consumption on Health and Environmental Sustainability* Raphaely, Talia, Marinova, Dora, 2015-10-19 This reference book is an IGI Global Core Reference for 2019 as it one of the best selling within the Environmental Agricultural and Physical Sciences subject area since 2015 Winning the Best in the World and Best Sustainable Food Book from the Gourmand Awards this title focuses on high quality research in developing a food culture that mitigates human and environmental damage Featuring research on trending topics such as limiting meat consumption

Transdisciplinary Perspectives on Transitions to Sustainability Edmond Byrne, Gerard Mullally, Colin Sage, 2016-06-17 Demonstrating how a university can in a very practical and pragmatic way be re envisioned through a transdisciplinary informed frame this book shows how through an open and collegiate spirit of inquiry the most pressing and multifaceted issue of contemporary societal unsustainability can be addressed and understood in a way that transcends narrow disciplinary work It also provides a practical exemplar of how far more meaningful deliberation understandings and options for action in relation to contemporary sustainability related crises can emerge than could otherwise be achieved Indeed it helps demonstrate how only through a transdisciplinary ethos and approach can real progress be achieved The fact that this can be done in parallel to or perhaps underneath the day to day business of the university serves to highlight how even micro seed initiatives can further the process of breaking down silos and reuniting C P Snow's two cultures after some four centuries of the relentless project of

modernity While much has been written and talked about with respect to both sustainability and transdisciplinarity this book offers a pragmatic example which hopefully will signpost the ways others can will and indeed must follow in our common quest for real progress

Sustainable Societies: Transition from theories to practice Sethi, Mahendra, 2022-01-17 The national economic situation rapidly changing societies increasing environment pollution amidst global warming around us are some of the most burning topics in day to day discussions news and scholarly discourses What we see are only the consequences of protracted actions policies and decisions The issues associated with these phenomena are highly complex that challenge a direct interpretation of their root causations indications results and long term impacts For instance is the issue of managing natural resources for industry business operations within a country an economic problem Or is it an ecological one Or rather a social one Could it be resolved with theories and techniques of either of these fields Well the issue and its redressal requires a combination of all the three disciplines And yet actions to integrate all of these fields have typically by passed one or more The framework that has over the years most commonly explained the convergence of different spheres of disciplinary knowledge has been sustainability At the same time its pursuit in practice the dominant public perception political agendas and the mainstream media remains elusive In absence of a critical theory on sustainable societies the contemporary development model is misinformed by vague notions of greening green growth eco development ecotourism smart cities etc largely steered by corporates and vested business groups The

Urban Informality Ahmed M. Soliman, 2021-04-26 This professional book introduces an analytical framework of urban informality perspectives in the Middle East that is aligned with the Global South The context of Egypt Lebanon and Jordan in the Middle East is the transregional focus of this book In these contexts the book opens a new arena of academic discussion on the theory and practice of urban informality Urban Informality Experiences and Urban Sustainability Transitions in Middle East Cities questions urban informality as a site of transitions interrelated and interlinked with urban sustainability transitions in speedy changes in a given environment The book presents urban informality sustainability transitions regarding resilience and adaptability that require shifts in urban systems Shifts from a static process to a dynamic process that eradicates the fragmentation between the tensions anxieties and pressures of four modes of production reproduction consumptions and distribution of goods and services in the city and its practices Finally through eleven chapters the concluding remarks explore to what extent and how can urban informality transitions be sustainable **Global**

Environmental Governance Karl Bruckmeier, 2018-09-25 This book provides a critical review of global environmental governance as part of the broader process of sustainably transforming modern society The author argues for substantial modifications outlining potential improvements in knowledge bridging processes integration and synthesis that offer valuable information for environmental policy and governance These improvements he argues should be achieved through the use of theoretical and empirical knowledge gleaned from global scenario analysis and interdisciplinary environmental research and with the aid of new practices for knowledge sharing cooperation and collective learning The analysis presented in the book is based on recent developments in social ecology and the author s interdisciplinary theory of society nature interaction Social Ecological Transformation Reconnecting Society and Nature Palgrave Macmillan 2016 Towards a Natural Social Contract

Patrick Huntjens, 2021-03-30 This open access book is a 2022 Nautilus Gold Medal winner in the category World Cultures Transformational Growth Development It states that the societal fault lines of our times are deeply intertwined and that they confront us with challenges affecting the security fairness and sustainability of our societies The author Prof Dr Patrick Huntjens argues that overcoming these existential challenges will require a fundamental shift from our current anthropocentric and economic growth oriented approach to a more ecocentric and regenerative approach He advocates for a Natural Social Contract that emphasizes long term sustainability and the general welfare of both humankind and planet Earth Achieving this crucial balance calls for an end to unlimited economic growth overconsumption and over individualisation for the benefit of ourselves our planet and future generations To this end sustainability health and justice in all social ecological systems will require systemic innovation and prioritizing a collective effort The Transformative Social

Ecological Innovation TSEI framework presented in this book serves that cause It helps to diagnose and advance innovation and spur change across sectors disciplines and at different levels of governance Altogether TSEI identifies intervention points and formulates jointly developed and shared solutions to inform policymakers administrators concerned citizens and professionals dedicated towards a more sustainable healthy and just society A wide readership of students researchers practitioners and policy makers interested in social innovation transition studies development studies social policy social justice climate change environmental studies political science and economics will find this cutting edge book particularly useful As a sustainability transition researcher I am truly excited about this book Two unique aspects of the book are that it considers bigger transformation issues such as societies relationship with nature purpose and justice than those studied in transition studies and offers analytical frameworks and methods for taking up the challenge of achieving change on the ground Prof Dr Ren Kemp United Nations University and Maastricht Sustainability Institute

Co-creating Sustainable Urban Futures Niki Frantzeskaki, Katharina Hölscher, Matthew Bach, Flor Avelino, 2018-01-09 This is a unique book that provides rich knowledge on how to understand and actively contribute to urban sustainability transitions The book combines theoretical frameworks and tools with practical experiences on transition management as a framework that supports urban planning and governance towards sustainability The book offers the opportunity to become actively engaged in working towards sustainable futures of cities Readers of this book will be equipped to understand the complexity of urban sustainability transitions and diagnose persistent unsustainability problems in cities Urban planners and professionals will build competences for designing transition management processes in cities and engaging with multidisciplinary knowledge in solution seeking processes The heart of the book marks the variety of very different local case studies across the world including amongst others Rotterdam in the Netherlands La Botija in Honduras Sydney in Australia and Cleveland in the US These rich studies give inspiration and practical insights to young planners on how to create sustainable urban futures in collaboration with other stakeholders The case studies and critical reflections on applications of transition management in cities offer food for thought and welcome criticism They also introduce new lenses to understand the bigger picture that co creation dynamics play in terms of power dis empowerment legitimacy and changing actor roles This will equip the readers with a deep understanding of the dynamics opportunities and challenges present in urban contexts and urban sustainability transitions

Sustainable Diets Pamela Mason, Tim Lang, 2017-03-27 How can huge populations be fed healthily equitably and affordably while maintaining the ecosystems on which life depends The evidence of diet s impact on public health and the environment has grown in recent decades yet changing food supply consumer habits and economic aspirations proves hard This book explores what is meant by sustainable diets and why this has to be the goal for the Anthropocene the current era in which human activities are driving the mismatch of humans and the planet Food production and consumption are key drivers of transitions already underway yet policy makers hesitate to reshape public eating habits and tackle the

unsustainability of the global food system The authors propose a multi criteria approach to sustainable diets giving equal weight to nutrition and public health the environment socio cultural issues food quality economics and governance This six pronged approach to sustainable diets brings order and rationality to what either is seen as too complex to handle or is addressed simplistically and ineffectually The book provides a major overview of this vibrant issue of interdisciplinary and public interest It outlines the reasons for concern and how actors throughout the food system governments producers civil society and consumers must engage with un sustainable diets

Social Change and the Coming

of Post-consumer Society Maurie J Cohen, Halina Szejnwald Brown, Philip J Vergragt, 2017-03-31 Consumer society is an unquestionably complex social construct. However, after decades of unremitting dominance, there are signs emerging that it is starting to falter both as a coherent and durable system of social organization and as a strategy for societal advancement. Debates concerning how we can transition beyond present energy and materials intensive consumer society are beginning to gain greater salience. *Social Change and the Coming of Post Consumer Society* aims to develop more complete appreciation of the relevant processes of social change and to identify effective interventions that could enable a transition to supersede consumer society. Bringing together leading interdisciplinary experts on social change, the book identifies and analyzes several ongoing small and modest scale social experiments. Possibilities for macro scale change from the interlinked perspectives of culture, economics, finance, and governance are then explored. These contributions expose the systemic problems that are emblematic of the current condition of consumer society, specifically the unsustainability of prevailing consumption practices and lifestyles and the persistence of inequalities. These observations are summarized and extended in the final chapter of the book. This volume will be of great interest to students and scholars of sustainable consumption, sustainability transitions, environmental sociology, and sustainable development. **The Ecosocial Transition of Societies**

Aila-Leena Matthies, Kati Närhi, 2016-10-04 This groundbreaking book both explains and expands the growing debate on ecological environmental social work at the global level. In order to achieve this, the book strengthens the environmental paradigm in social work and social policy by undertaking further research on theoretical and conceptual clarification as well as distinct reflections on its practical directions. Divided into five parts, concepts, the impact of environmental crises, sustainable communities and lifestyles, food politics, and the profession in transition, this work's main objective is to place ecological social work as a part of the more comprehensive and interdisciplinary eco-social transition of societies towards sustainability, balancing economic and social development with the limited resources of the natural environment. By focussing on these five core concepts, it shows how social work and social policy contribute to this transition through having a research-based approach and orientation on solutions rather than problem analysis. The book will be of interest to scholars from a broad range of disciplines including those in social work and social policy, sustainability, economics, agriculture, and environmental studies.
