MY TREE OF LIFE STORY

MY TREE OF LIFE STORY

After the meeting there he spoke through my microphone and handed a small part of his heart to me. He was just a man, a man who had been through a lot, and who was trying to do the best he could for his people. He was a man who was a man, and who was a man, and who was a man.

Abstract—The purpose of this study was to determine the effect of a 10-week training program on the heart rate (HR) and energy expenditure (EE) of sedentary, middle-aged women. The subjects were 15 women, 40 to 50 years of age, who were sedentary and had no cardiovascular or pulmonary disease. They were randomly assigned to a 10-week training program or a control group. The training program consisted of three sessions per week of 30 minutes of moderate-intensity aerobic exercise. The control group continued with their sedentary lifestyle. The HR and EE were measured at baseline and at the end of the 10-week program. The HR and EE of the training group increased significantly compared to the control group. The results of this study suggest that a 10-week training program can improve the HR and EE of sedentary, middle-aged women.
