The Great Music City Andrea Baker, 2019-03-01 In the 1960s as gentrification took hold of New York City Jane Jacobs predicted that the city would become the true player in the global system Indeed in the 21st century more meaningful comparisons can be made between cities than between nations and states Based on case studies of Melbourne Austin and Berlin this book is the first in depth study to combine academic and industry analysis of the music cities phenomenon Using four distinctly defined algorithms as benchmarks it interrogates Richard Florida's creative cities thesis and applies a much needed synergy of urban sociology and musicology to the concept mediated by a journalism lens Building on seminal work by Robert Park Lewis Mumford and Jane Jacobs it argues that journalists are the cultural branders and street theorists whose ethnographic approach offers critical insights into the urban sociability of music activity

Seeking Accountability for the Unlawful Use of Force Leila Nadya Sadat, 2018-05-31 Analysis of how to prevent war and reinforce UN systems by imposing accountability on individuals and states for the unlawful use of force

Geographies, Mobilities, and Rhythms over the Life-Course Elaine Stratford, 2014-11-20 By thinking in terms of the geographies of mobilities we are better able to understand the central importance of movements rhythms and shifting emplacements over the life course This innovative book represents research from a new and flourishing multidisciplinary field that includes among other things studies on smart cities infrastructures and networks mobile technologies for automated highways or locative media mobility justice and rights to stay or enter or reside These activities cadences and changing attachments to place have profound effects first upon how we conduct or govern ourselves and each other via many social institutions and second upon how we constitute the spaces in and through which our lives are experienced This scholarship also has clear connections to numerous aspects of social and spatial policy and planning

The UK Regional-National Economic Problem Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth

Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

Rare Earth Frontiers Julie M. Klinger, 2018-01-15 *Rare Earth Frontiers* is a timely text As Klinger notes rare earths are neither rare nor technically earths but they are still widely believed to be both Although her approach focuses on the human or cultural geography of rare earths mining she does not ignore the geological occurrence of these mineral types both on Earth and on the moon This volume is excellently organized insightfully written and extensively sourced Choice Drawing on ethnographic archival and interview data gathered in local languages and offering possible solutions to the problems it documents this book examines the production of the rare earth frontier as a place a concept and a zone of contestation sacrifice and transformation *Rare Earth Frontiers* is a work of human geography that serves to demystify the powerful elements that make possible the miniaturization of electronics green energy and medical technologies and essential telecommunications and defense systems Julie Michelle Klinger draws attention to the fact that the rare earths we rely on most are as common as copper or lead and this means the implications of their extraction are global Klinger excavates the rich historical origins and ongoing ramifications of the quest to mine rare earths in ever more impossible places Klinger writes about the devastating damage to lives and the environment caused by the exploitation of rare earths She demonstrates in human terms how scarcity myths have been conscripted into diverse geopolitical campaigns that use rare earth mining as a pretext to capture spaces that have historically fallen beyond the grasp of centralized power These include legally and logistically forbidding locations in the Amazon Greenland and Afghanistan and on the Moon

Really Good Schools James Tooley, 2021-04-12 Almost overnight a virus has brought into question America's nearly 200 year old government run K 12 school system and prompted an urgent search for alternatives But where should we turn to find them Enter James Tooley's *Really Good Schools* A distinguished scholar of education and the world's foremost expert on private low cost innovative education Tooley takes readers to some of the world's most impoverished communities located in some of the world's most dangerous places including India and such war torn countries as Sierra Leone Liberia and South Sudan There in places where education experts fear to tread Tooley finds thriving private schools that government multinational NGOs and even international charity officials deny exist Why Because the very existence of low cost high quality private schools shatters the prevailing myth in the U S U K and western Europe that absent government affordable high quality

schools for the poor could not exist But they do And they are ubiquitous and in high demand Founded by unheralded local educational entrepreneurs these schools are proving that self organized education is not just possible but flourishing often enrolling far more students than free government schools do at prices within reach of even the most impoverished families In the course of his analysis Tooley asks the key questions What proportion of poor children is served How good are the private schools What are the business models for these schools And can they be replicated and improved The evidence is in In poor urban and rural areas around the world children in low cost private schools outperform those in government schools And the schools do so for a fraction of the per pupil cost Ubiquity affordability quality value for money equity choice and sustainability these are the seven categories by which schooling should be judged according to Tooley In every instance one is forced to conclude that low cost non governmental entrepreneurial education as practiced by the poor around the globe contains the key to their rise to prosperity and leadership positions within their own respective cultures Alarmed by recent government barriers in education Americans can now find hope in the triumph in the face of acute adversity of these remarkable schools Because of the pandemic parents in America and Europe are discovering that the education of their children is indeed possible and likely far better without government meddling with rigid seat time mandates outdated school calendars absurd age driven grade levels and worse testing regimes And having experienced the first fruits of educational freedom parents will be increasingly open to the possibilities of ever greater educational entrepreneurship and innovation Thankfully they have Really Good Schools to show the way

colonial critical race theory lens Taking a multi disciplinary approach the book interrogates the operationalisation of the Rome Statute to detail a Eurocentric hegemony at the core of ICL It explores how colonialism and slavery have come to shape ICL exposing the perpetuation of the colonial and warns that it has ominous contemporary and future implications for Africa As currently envisaged and acted out at the ICC this law is founded on deceptive and colonial ideas of what is wrong in with the world The book finds that the contemporary ICL regime is founded on white supremacy that corrupts the law s interaction with the African The African is but a unit utilised by the global elite to exploit and extract resources From time to time these alliances disintegrate with ICL becoming a retaliatory tool of choice What is at stake is power not justice This power has been hierarchical with Eurocentrism at the top throughout modern history Colonialism is seen not to have ended but to have regerminated through the foundation of the independent African state The ICC reproduces the colonial by use of European law and ultimately the over representation of the black accused To conclude the book provides a liberated African forum that can address conflicts in the content with a call for the end of the ICC s involvement in Africa The demand is made for an African court that utilises non colonising African norms which are uniquely suited to address local conflicts

Multidisciplinary in nature this book will be of great interest to students and scholars of international criminal law criminal justice human rights law African studies global social justice sociology anthropology postcolonial studies and philosophy
