crucial to ensuring that the tax system does not diverge too far from what it should be or could be. It is essential to understand the answers to some of the seemingly basic questions that surround tax before we can even begin to think about what a tax system should look like. This collection brings together major themes and difficult questions in the philosophical foundations of tax law. The chapters consider practical issues such as justification, enforcement, design and mechanics and provide a full and coherent analysis of the basis for tax law. **Philosophical Foundations of Tax Law** allows the reader to consider how tax systems should move forward in the modern world with a sound philosophical basis to provide the practical tax system that the state requires and citizens deserve.

Castells in Africa Muller, Johan, Cloete, Nico, 2017-11-28. **Castells in Africa: Universities and Development** collects the papers produced by Manuel Castells on his visits to South Africa and publishes them in a single volume for the first time. The book also publishes a series of empirically based papers which together display the multi-faceted and far-sighted scope of his theoretical framework and its fecundity for fine-grained detailed empirical investigations on universities and development in Africa. Castells in his afterword to this book always looking forward assesses the role of the university in the wake of the upheavals to the global economic order. He decides the university's function not only remains but is more important than ever. This book will serve as an introduction to the relevance of his work for higher education in Africa for postgraduate students, reflective practitioners and researchers. Includes two previously unpublished public lectures and an Afterword by Manuel Castells.

The Emerging Middle East Financial Markets Henry T. Azzam, 2015-08-28. The book aims to unravel the potentials of Middle East financial markets which are spread over a large and wealthy part of the world. These markets are gradually being opened for international investors seeking diversification and rewarding risk-adjusted returns. However, opening up to international investors is a necessary but not a sufficient condition to attract institutional money needed to provide depth and professionalism to these markets. Without a cultural shift towards more transparency, better regulations and governance and the availability of custody, clearance and equity research up to international best practice, not much institutional money will be forthcoming to the region. Funding sources in the Middle East and North Africa Region are still predominantly channeled through the banking system with equity and fixed income markets playing a marginal role. While the world's financial markets show on average a balanced structure of bank assets, stock market capitalization and debt securities, the capital mix in the region is heavily skewed towards bank assets with a share of 58.8%, equities around 34% and debt securities (bonds and Sukuk) 7.2%. Stock markets of the UAE and Qatar have recently been upgraded to emerging market status which together with Egypt are the only three Arab countries that have selected listed companies featuring in the Morgan Stanley Capital Index for Emerging Markets. MSCI EM Saudi Arabia has opened its stock market to direct investment by foreign financial institutions in the second half of 2015. The opening of the Saudi stock market is a major positive development for the region's capital markets. The path ahead for MENA finance has become now clearer. The relative weight of commercial banks in the financial system

will diminish gradually and a wider range of financial services will be provided by deeper and increasingly more sophisticated debt and equity capital markets in line with worldwide trends Sharia compliant products such as Sukuk are expected to continue to grow at double digit rate to meet the strong demand generated regionally and internationally
