This manual covers the information needed to install the SoniP Standard and iCLASS Enhanced Keypads. See *19810016 SoniP Keypad User Guide* for user options and service procedures. See *19810005 SoniP iBase Installation Guide* or *19810022 FlexiBase Installation Guide* for complete planning and additional installation procedures. See *19810015 SoniP iBase/FlexiBase Programming Guide* for options and programming procedures.

1.3 Overview

The Standard and Enhanced Keypads are compatible with the SoniP iBase and FlexiBase Systems. The two keypads have the same system and programming functionality.

The iCLASS Enhanced Keypad has an integrated HID iCLASS reader that can be configured as an Arm/ Disarm reader or ingress access control.

The Standard/Enhanced Keypad is the primary user interface for navigating system programming, performing simple data entry, and controlling the SoniP iBase and FlexiBase System alarms and access control functions. A Liquid Crystal Display (LCD), with scrolling text, is provided for displaying data entry, system status messages, programming menus, and function options. These can be accessed and selected through the alphanumeric digital keypad. The LCD display is backlit and the keypad is low level illuminated, or in case of poor lighting conditions, may be programmed for high level illumination. The LCD backlight remains illuminated at the normal brightness at all times except when a button has been pressed. The keypad high level illumination remains active for 15 seconds after the last key press. The keypad can be mounted up to 100m (328 ft.) from the control panel, nearest module, or power hub.

Note: If a keypad needs to be located more than 100m (328 ft.) from the previous device, a Power Hub module must be installed in a convenient location so that the 100m (328 ft.) limitation is observed for all peripheral bus wire runs.
