Researching into Teaching Methods Bennett, Clinton,Foreman-Peck, Lorraine,Higgins, Chris (All Senior Lecturers, Westminster College),2014-05-12

This is one of a series of short practical guides aimed at lecturers and tutors in colleges and universities to help them get started on research. It covers all aspects of teaching methods, strategies for interactive teaching methods, small and large group teaching and student learning. The Medical Times and Gazette, 1884 **Physical Time Within Human Time**

Anne Giersch, Leonardo P.G. De Assis, 2023-11-13. There is a gap between the concept of time in physics and that in neuroscience. Human time is dynamic and involves a dynamic flow, whereas physical time is said to be frozen as in Einstein's Block Universe. The result has been a fierce debate as to which time is real. Our recently accepted paper by Frontiers provides a compromise dualistic view. The claim is that within the cranium there already exists an overlooked complete and independent physical system of time that is compatible with the essence of modern spacetime cosmology. However, the brain through a process of evolution developed a complementary illusory system that provides a supplementary, more satisfying experience of temporal experiences that leads to better adaptive behavior. The Dualistic Mind View provides evidence that both systems of time exist and are not competitive. Neither need be denigrated.
