

We must rethink and change the worn out concept of the "job market" under capitalism, which is designed to dispose of people in a second if deemed unprofitable to the system.

**The Commonwealth**, 1991

[For an Anti-capitalist Psychology of Community](#) Nick Malherbe, 2022-04-22 Anti capitalist political struggle is a site of struggling psychologies Conscious political action is never far from unconscious desire and the fight for material justice is always also the fight for dignity and psychological well being Yet how might community psychologists conceive of their discipline in a way that opposes the very capitalist political economy that historically most of the psy disciplines have bolstered in return for disciplinary legitimacy In its consideration of an anti capitalist psychology of community this book does not ignore or try to

resolve the contradictory position of such a psychology. Instead it draws on these contradictions to enliven psychology to the shifting demands both creative and destructive of a community centred anti capitalism. Using practical examples the book deals with the psychological components of building community centred social movements that challenge neoliberal capitalism as a political system, an ideology and a mode of governing rationality. The book also offers several theoretical contributions that grapple with how an anti capitalist psychology of community can remain attentive to the psychological elements of anti capitalist struggle, what the psychological can tell us about anti capitalist politics and how these politics can shape the psychological. Developmentalism Graham Harrison, 2020. Developmentalism uses 250 years of case studies to show the deep contextualization of capitalist transformation as well as the massive improvements in material life that it has generated.

*On Civilizing Capitalism* Brian Ellis, 2023-06-15. This book shows how modern political economic and moral theory including our ideas of liberty and individualism are trapped in 17th century notions of intuitive reasoning and not informed by modern scientific understanding. Brian Ellis starts with a re appraisal of the founding of the United Nations and the political and economic policies of the post war reconstruction period. He then shows how this period despite its many faults embodied a philosophy more closely embedded in scientific realism than dominant theories of either left or right today. He goes on to develop this philosophy meticulously demolishing theories of Rawls, Nozick and others along the way. The result is a philosophy that investigates how a society actually works, supports evidence based economics and can better enable human beings to flourish. It is a philosophy that can also accommodate the historical differences between societies and their different but parallel development strategies over time.      **National Capitalism: How to Save America** Tom Strabo, 2018-02-07. In

any nation there are only two types of capitalism: capitalism that's good for the nation and capitalism that isn't. National capitalism means that everyone in the nation profits from capitalism. No one is left behind. Global capitalism, the prevailing form of capitalism in today's world, destroys nations and their people. Global capitalism is totally contemptuous of the nation state and is solely about maximizing the profits of the stateless global elite who will go anywhere and screw over anyone to get the highest returns. National capitalism, by contrast, isn't about Wall Street. It serves Main Street. It guarantees that everyone in Main Street gets richer. National capitalism involves continuous investment in the people. The people are always the focus of national capitalism. It's time for a national rebirth for the triumph of Main Street and the abolition of Wall Street. Why would anyone allow the wolves to feed on them?      **The Scottish Economy and Nationalism** James Foley, 2023-08-18. Scotland's economic capacity to prosper independently of Britain has become a key political issue dominating the independence referendum of 2014 and continuing to influence British politics since. But as this book shows, the Scottish economy is not merely a statistical object; it is also a political, sociological and cultural idea which has been imagined and constructed. The book explores the history of how Scotland has been framed in statistical and policy terms which are laden

with conflicts over meaning ranging from class struggles and struggles against external control to the ongoing debate over national independence Using Scotland as a case study for examining the political meaning of the economy the book also considers the origins of efforts to measure the Scottish economy in the British nationalist terms of regional policy It then considers the influence in turn of North Sea oil globalisation Europeanisation class dealignment and neoliberal enterprise ideology in changing the meanings attached to the Scottish economy These form necessary conditions for the debate on national independence where the nature and the future of the Scottish economy remain the central controversy By examining the economic ideas of a self proclaimed cosmopolitan nationalist movement the study will offer deeper insights into how nationalists are adapting to the crisis of globalisation This book marks a significant contribution to the literature on Scottish independence as well as economic sociology nationalism critical geography and political economy more broadly

**If You're a Classical Liberal, How Come You're Also an Egalitarian?** Åsbjørn Melkevik, 2020-03-28 Classical liberalism has wrongly been regarded as an ideology that rejects the welfare state In this book sbj rn Melkevik corrects this common reading of the classical liberal tradition by introducing a theory of rule egalitarianism Not only is classical liberalism compatible with social justice but it can also help us understand why some egalitarian endeavours are an essential feature of a market society If a necessary link exists between the classical liberal tradition and the moral and institutional dimensions of the rule of law then this tradition is bound to uphold a substantial form of social justice Coherence requires that classical liberals like Friedrich Hayek and Milton Friedman adopt an authentic egalitarian program They should ameliorate poverty and limit inequality not merely out of prudence or collective self interest but for the natural justice of ongoing social cooperation as well as for the impartiality of market institutions
