InDesign—Swatches

Checking links

Sometimes an RGB Switch or the Registration Switch gets applied to type that should be black. You can use the Separations Preview panel to check your document.

- Open the Separations Preview panel (Window > Output > Separations Preview) to check the inks in your document. Unless your job prints with a spot color or spot varnish, you should only see CMYK inks in the Separations Preview panel.

Click the eyeball icon to toggle the visibility of the Black plate to see if type containing Black ink also contains other ink.

100

The Swatches panel lets you create and name colors, gradients, or tints and quickly apply them to your document. Swatches make it easier to modify color schemes without having to locate and adjust each individual object. Keeping your Swatches panel clean, helps avoid picking the wrong swatches.

- Open the Swatches panel (Window > Color > Swatches) and select All Unused from the Byed menu.
- Delete the unused swatches by clicking on the trash icon at the bottom of the Swatches panel.

Tip You can't delete the Registration Search, but you can drag it down to the bottom of the results panel to 0 results. It has to be at least one result to be able to delete.
