Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome

contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties Multidimensional Ranking Frans A. van Vught, Frank Ziegele, 2012-02-21 During the last decades ranking has become one of the most controversial issues in higher education and research It is widely recognized now that although some of the current rankings can be severely criticized they seem to be here to stay In addition rankings appear to have a great impact on decision makers at all levels of higher education and research systems worldwide including in universities Rankings reflect a growing international competition among universities for talent and resources at the same time they reinforce competition by their very results Yet major concerns remain as to the rankings methodological underpinnings and to their various impacts This new book presents a comprehensive overview of the current state of the art of ranking in higher education and research and introduces a completely new approach called multidimensional ranking In part 1 rankings are discussed in the broader context of quality assurance and transparency in higher education and research In addition the many current ranking methodologies are analyzed and critized and their impacts are explored In part 2 a new approach to ranking is introduced based on the basic idea that higher education and research institutions have different profiles and missions and that the performances of these institutions should reflect these differences This multidimensional approach is operationalized in a new multidimensional and user driven ranking tool called U Multirank U Multirank is the outcome of a pilot project sponsored by the European Commission in which the new ranking instrument was designed and tested at a global scale *So you want to be a Doctor?* David Metcalfe, Harveer Dev, Michael Moazami, 2021-03-04 So you want to be a doctor Be confident and fully prepared for every step of your medical school application Packed with insight tips and information you won t find anywhere else this essential guide helps applicants succeed against tough competition Full of practical advice from those in the know Over 100 medical students and admissions tutors have contributed to unique profiles of every medical school in the UK with rankings and detailed explanations of what it is really like to study at each one Discover how often students encounter patients how teaching is delivered what the facilities are like and most importantly what admissions tutors are looking for Every medical school is different and this book helps students choose the school they are best suited to There is advice at every turn providing support all the way from choosing A levels finding work experience and writing personal statements to strong strategies for interview success The authors who have all been through the process themselves bring together insider information such as How much medical school really costs How graduates of each medical school perform after they qualify Which work experience is best and how to get it How to perform well on standardised admissions tests such as the UCAT and BMAT plus sample questions
