

Build off a basic sphere and pull rhythm lines down for the trunk.

See how the base of the ear is a cylinder that fits into the top of the skull. The trunk is series of cylinders. The tusks fit into the face. Notice the large planes.

If you measure an Indian elephant in head lengths from the crown of the head down to where the tusks start, it is 2 1/2 heads high at the shoulder and 2 1/4 heads long from the shoulder to the ischium.

Pronounced cheek bone (zygomatic arch)

Low elbow

The back of the forearm is relatively straight

Large pad for cushion

Head carried low

Note the rhythm in the trunk

The front of the forearm is curved

Note the break in the wrist

Elephants carry all their weight on the tips of their toes
