and diplomats with a platform from which to amplify their voices in the West. Analyses by these experts often appeared in IISS publications but the Institute also gained key insights through its well established conferences and lecture series. These initiatives illuminated Japanese strategic thinking and perspectives on contemporary critical issues in Japan's and Asia's foreign security and defence policy. This Adelphi book through its collection of earlier analysis helps the reader to understand the evolution of Japanese strategic thought from the 1960s until today and shines a light on the continuities and changes in this thinking. New original analysis of the material seeks to identify areas where such thinking was prescient and remains relevant to the contemporary strategic environment and other areas where predictions failed or assumptions were proved wrong. These new essays were also informed by interviews of Japanese senior scholars and diplomats who spent time with the IISS. This book seeks to frame, educate and guide strategic thinking on the most pressing issues of today both in and outside Japan and Asia and will be of great interest to analysts, practitioners and students of international affairs.

Societal Entrepreneurship Karin Berglund, Bengt Johannisson, Birgitta Schwartz, 2012-01-01 Entrepreneurship generally is about creative organizing but with social enterprising this is especially so. Most social ventures cross the boundaries between the private, the public and the non profit voluntary sectors. This broad involvement of actors and intertwining of sectors makes the label societal entrepreneurship appropriate. Stating the importance of both the local and the broader societal context, the book reports close up studies from a variety of social ventures. Generic themes include positioning societal entrepreneurship against other images of collective entrepreneurship, critically penetrating its assumptions and practices and proposing ways of promoting societal entrepreneurship more widely. Providing a new conceptual framework and research methodology, this compendium will prove insightful for academic scholars. The basic concepts and illustrative cases stories will also appeal to students and reflective practitioners.

Universe Launch John T. Shaffer, 2019-08-29 The normal course of human existence can be dramatically altered instantly. Universe Launch defines the moment of nuclear confrontation, isolates it in the days ahead, then catapults the reader into the very near future. A new world has emerged where ideas and actions have merged with the remains of the past. Humanity staggered on the verge of annihilation, then surged forward. Two researchers, isolated by events for five years and unsure of the new government, decide to change the approach to their mission. They need to understand the course of events ahead and agree on their next step in the aftermath of near extinction. They break the rules of their assignment and find a pathway. They take it. Chance and circumstance congeal into breakthrough. There is great meaning in the moment, meeting others, reliving the ordeal of survival, they define their revitalized mission. Self realization and compassion await them on their journey of discovery. Join the survivors of mankind's self inflicted destruction as they find a way through the post apocalyptic landscape. Meet new menaces as they emerge and threaten the hope of human progress. Feel the rebirth of humanity from the desolation of near extinction. Comprehend Universe Launch, the possibility of hope.
