Whale Life Cycle Diagram:

Did I Ever Tell You about the Whale? William L. Nolte, 2008-11-01 Foreword by James W. Billbro Technology maturity: What is it and why is it important? For more than ten years the Government Accountability Office (GAO) has criticized federal agencies for a history of cost and schedule overruns on a significant portion of their procurement programs. GAO has repeatedly reported that the use of immature technologies in programs is a primary cause for these overruns. In spite of these repeated reports, the problems in government procurement have not improved. In fact, recent reports indicate that the problems are getting worse. One cause of this worsening situation might be that while GAO identified lack of technology maturity as a problem, they did not tell how to measure technology maturity or conversely its lack. This groundbreaking work attempts to fill this gap by examining the current state of technology maturity measurement, pointing out strengths and weaknesses of available measures, and proposing a complete technology maturity assessment as a potential solution. The book also includes a discussion of risk during technology development. Whales of the Southern Ocean Yuri Mikhalev, 2020-01-28 Based on actual data of Soviet whaling and reliable methodologies that existed at the time when this monograph was written, it examines the distribution and migration patterns of whales of the Southern Ocean. It defines distinct populations on the basis of phenes as well as whale breeding zones which are located in the adjacent to the Southern Ocean waters at lower latitudes. The book records the presence of a new species of killer whale in the Southern Ocean, *Orcinus nana*. Prenatal growth patterns, pregnancy and lactation duration, mean sizes of new born whales are determined. Methods for the graphic recording of registering structures are described, and an original method for their decoding is proposed to determine animal age. The age of sexual and physical maturity, life expectancy is determined. Earlier unknown pair formations on the lower jaw of baleen whales and sperm whales are described together with their macro histological and electronic microscopic structure. The impact of the extermination of whales on the Southern Ocean ecosystem is examined. Recommendations for control of the current state of whale populations are given, and perspectives of whale population recovery are estimated. Regions that could be used as testing areas for whale registration method are defined. The book is intended for biologist, cytologists, ecologists, and other specialists interested in cetaceans and for biology students. **The Biology and Conservation of Animal Populations** John A. Vucetich, 2024-07-02 This work is the first textbook on population biology grounded in conservation of wildlife, giving students an approachable and motivational context for equation-heavy fundamentals. **What Do You Know About Life Cycles?** Anna Claybourne, 2017-12-15 Every living thing goes through a life cycle, but each species has its own unique steps in the circle of life. Graham Burnett tells the fascinating story of the transformation of cetaceans from grotesque monsters useful only as wallowing kegs of fat and fertilizer to playful friends of humanity bellwethers of environmental devastation and finally totems of the counterculture in the Age of Aquarius When Burnett opens his story ignorance reigns even Nature was misclassifying whales at the turn of the century and the only biological study of the species was happening in gruesome Arctic slaughterhouses But in the aftermath of World War I an international effort to bring rational regulations to the whaling industry led to an explosion of global research and regulations that while well meaning were quashed or widely flouted by whaling nations the first shot in a battle that continues to this day The book closes with a look at the remarkable shift in public attitudes toward whales that began in the 1960s as environmental concerns and new discoveries about whale behavior combined to make whales an object of sentimental concern and public adulation A sweeping history grounded in nearly a decade of research The Sounding of the Whale tells a remarkable story of how science politics and simple human wonder intertwined to transform the way we see these behemoths from below **Applied Mathematical Demography** Nathan Keyfitz, Hal Caswell,2005-11-14 Focuses on applications of demographic models This book introduces the life table to describe age specific mortality and uses it to develop theory for stable populations and the rate of population increase This theory is then revisited in the context of matrix models for stage classified as well as age classified populations **ANIMALS** NARAYAN CHANDER,2024-06-06 If you need a free PDF practice set of this book for your studies feel free to reach out to me at cbsenet4u gmail com and I'll send you a copy THE ANIMALS MCQ MULTIPLE CHOICE QUESTIONS SERVES AS A VALUABLE RESOURCE FOR INDIVIDUALS AIMING TO DEEPEN THEIR UNDERSTANDING OF VARIOUS COMPETITIVE EXAMS CLASS TESTS QUIZ COMPETITIONS AND SIMILAR ASSESSMENTS WITH ITS EXTENSIVE COLLECTION OF MCQS THIS BOOK EMPOWERS YOU TO ASSESS YOUR GRASP OF THE SUBJECT MATTER AND YOUR PROFICIENCY LEVEL BY ENGAGING WITH THESE MULTIPLE CHOICE QUESTIONS YOU CAN IMPROVE YOUR KNOWLEDGE OF THE SUBJECT IDENTIFY AREAS FOR IMPROVEMENT
