Bhadeshia, 2013-03-01 The Trends conference attracts the world's leading welding researchers. Topics covered in this volume include friction stir welding, sensing, control and automation, microstructure and properties, welding processes, procedures and consumables, weldability, modeling, phase transformations, residual stress and distortion, physical processes in welding and properties and structural integrity of weldments.

Engineering Applications of Fracture Analysis G. G. Garrett, D. L. Marriott, 2014-05-23 Engineering Applications of Fracture Analysis is a record of the proceedings of the First National Conference on Fracture held at Johannesburg, South Africa, in November 1979. The papers presented in the conference provide a general picture of fracture studies in South Africa. The contributions cover the theoretical analyses of the influence of dislocation stresses in initiating fracture, practical design of steel components exposed to high temperature environments, problems encountered in South African industry such as rock drilling equipment failures, unwanted rock fractures in mines and safety problems in nuclear reactors, fracture study techniques and formal applications of fracture mechanics. The book will be of interest to metallurgists, engineers and materials specialists.

Innovation and International Corporate Growth Alexander Gerybadze, Ulrich Hommel, Hans W. Reinert, Dieter Thomaschewski, 2010-07-17 Research and development (R D) as well as innovation are the drivers of change and the key determinants of growth in many industry and service sectors. In spite of the financial turmoil and restructuring of the world economy after 2008, investment in R D is expected to grow further. Innovation competence will continue to be a major success factor for internationally operating companies. The book presents a state of the art account of innovation management and the role of R D and innovation strategy for corporate growth and renewal. It follows a top down approach starting from corporate strategy and describes the effective integration of corporate R D, business unit projects and operational performance improvements. The book offers portraits of leading innovators and high performing corporations and provides a rich collection of best practice examples.

Progress in Structural Engineering, Mechanics and Computation Alphonse Zingoni, 2003-04-15 The Second International Conference on Structural Engineering, Mechanics and Computation was held in Cape Town, South Africa, in 2004. Its mission was to review and share the latest developments and address the challenges that the present and the future pose. This book contains its key findings with contributions from academics, researchers and practitioners in the broad fields of structural mechanics, associated computation and structural engineering. Their work builds a clear picture of recent achievements in the advancement of knowledge and understanding in these areas. This text therefore covers all aspects of structural mechanics and is broken down into 36 sections which communicate the latest discoveries and developments across the following areas: vibration dynamics, impact response, soil structure interaction and damage mechanics, numerical modeling and computational methods, practical aspects of the analysis, design and
