Dictionary of the English Language Samuel Johnson, 1882 **The Translation of Religious Texts in the Middle Ages** Domenico Pezzini, 2008 The transition from Latin to vernacular languages in the late Middle Ages and the dramatic rise of a new readership produced a huge bulk of translations particularly of religious literature in its various genres The solutions are so multifarious that they defy any attempt to outline general theories This is particularly visible when the same text is translated or rewritten at different times and in different languages or genres Through a minute analysis of texts this book aims at highlighting lexical syntactic and stylistic choices dictated not only by the source but also by new readers and patrons or by new destinations of the works Established categories such as literalness and fidelity are thus questioned and integrated with these other factors which while being more external do nonetheless impinge on the very idea of translation and consequently on its assessment Far from being a mere transfer from one language to another a medieval translation verges on a form of creative writing and as such its study becomes a fascinating investigation into the very process of textual production *English Church Furniture, Ornaments and Decorations, at the period of the Reformation. Common Sense in Environmental Management Jonathan Woolley, 2019-09-02 Common Sense in Environmental Management examines common sense not in theory but in practice Jonathan Woolley argues that common sense as a concept is rooted in English experiences of landscape and land management and examines it ethnographically unveiling common sense as key to understanding how British nature and public life are transforming in the present day Common sense encourages English people to tacitly assume that the management of land and other resources should organically converge on a consensus that yields self evident practical results Furthermore the English then tend to assume that their own position reflects that consensus Other stakeholders are not seen as having legitimate but distinct expertise and interests but are rather viewed as being stupid and or immoral for ignoring self evident pragmatic truths Compromise is therefore less likely and land management practices become entrenched and resistant to innovation and improvement Through a detailed ethnographic study of the Norfolk Broads this book explores how environmental policy and land management in rural areas could be more effective if a truly common sense was restored in the way we manage our shared environment Using academic and lay deployments of common sense as a route into the political economy of rural environments this book will be of great interest to scholars and students of socio cultural anthropology sociology human geography cultural studies social history and the environmental humanities

Luise Gottsched the Translator Hilary Brown, 2012 Critics have paid increasing attention to the oeuvre of Luise Gottsched 1713-62 Germany's first prominent woman of letters but have neglected her lifelong work of translation which encompassed over fifty volumes and an extraordinary range from drama and poetry to philosophy history archeology even theoretical physics This first comprehensive overview of Gottsched's translations places them in the context of eighteenth century intellectual literary and cultural history showing that they were part of an

ambitious progressive program undertaken with her famous husband to shape German culture during the Enlightenment In doing so it casts Gottsched and her work in an entirely new light Including chapters on all the main subject areas and genres from which Gottsched translated it also explores the relationship between her translations and her original works demonstrating that translation was central to her oeuvre A bibliography of Gottsched's translations and source texts concludes the volume The Publishers Weekly, 1887 **Challenging Times** Constance Backhouse, David H.

Assessment of Mental Capacity The British Medical Association, 2015-12-08 Doctors lawyers and other professionals

often need to make an assessment of a person's mental capacity. This book helps to support these professionals by giving them a fuller understanding of the law in all situations where an assessment of capacity may be needed, clarifying the roles of professionals and providing an aid to communication both between them and with the person being assessed. Written by experts from a variety of disciplines, *Assessment of Mental Capacity* combines a precise statement of the law with a practical, jargon-free approach to provide guidelines on a range of issues from capacity to form intimate personal relationships to capacity to consent to medical treatment. The fourth edition has been updated and expanded to take account of recent case law and current good practice revision of the Mental Health Act 1983 Code of Practice, the rising prominence of the United Nations Convention on the Rights of Persons with Disabilities. It provides an essential source of guidelines and information including extracts from Mental Capacity Act 2005 and the Code of Practice and is an indispensable tool for health and legal professionals.
