International Handbook of Behavior Modification and Therapy Alan S. Bellack,Michel Hersen,Alan E. Kazdin,2012-12-06 It is particularly gratifying to prepare a second edition of a book because there is the necessary implication that the first edition was well received Moreover now an opportunity is provided to correct the problems or limitations that existed in the first edition as well as to address recent developments in the field Thus we are grateful to our friends colleagues and students as well as to the reviewers who have expressed their approval of the first edition and who have given us valuable input on how the revision could best be structured Perhaps the first thing that the reader will notice about the second edition is that it is more extensive than the first The volume currently has 41 chapters in contrast to the 31 chapters that comprised the earlier version Chapters 3 9 29 and 30 of the first edition either have been dropped or were combined whereas 14 new chapters have been added In effect we are gratified in being able to reflect the continued growth of behavior therapy in the 1980s Behavior therapists have addressed an ever increasing number of disorders and behavioral dysfunctions in an increasing range of populations The most notable advances are taking place in such areas as cognitive approaches geriatrics and behavioral medicine and also in the treatment of childhood disorders *Handbook on the Neuropsychology of Epilepsy* William B. Barr,Chris Morrison,2014-12-02 Once feared and misunderstood even among the medical community epilepsy has since largely been demystified Besides the characteristic seizures various cognitive behavioral and emotional difficulties are recognized as associated with the condition and patients are finding relief in medical management and or surgical intervention Not surprisingly neuropsychology has emerged as a major component in treatment planning program development and assessment of surgical candidates Geared toward beginning as well as veteran clinicians the Handbook on the Neuropsychology of Epilepsy offers readers a skills based framework for assessment and treatment using current evidence and standardized terminology Expert coverage reviews widely used methods for evaluating key aspects of patient functioning MRI MEG electrocortical mapping the Wada test and presents guidelines for psychotherapeutic and cognitive remediation strategies in treating comorbid psychiatric conditions Given the diversity of the patient population additional chapters spotlight issues specific to subgroups including high and low functioning as well as geriatric and pediatric patients This integrative hands on approach benefits a range of practitioners across medical and neurological settings Topics featured

in the Handbook Neuropsychological assessment across the lifespan Evaluating the epilepsy surgical candidate methods and procedures The Wada test current perspectives and applications Assessing psychiatric and personality disorders in the epilepsy patient Evaluation and management of psychogenic non epileptic attacks Neuropsychological assessment with culturally diverse patients Practical and flexible in its coverage the Handbook on the Neuropsychology of Epilepsy serves not only neuropsychologists and neurologists but also primary care physicians such as internists family physicians and pediatricians

Handbook of Assessment in Clinical Gerontology Peter A. Lichtenberg, 2010-08-20 New trends in mental healthcare practice and a rapid increase in the aged population are causing an explosion in the fields of clinical gerontology and geropsychology today This comprehensive second edition handbook offers clinicians and graduate students clear guidelines and reliable tools for assessing general mental health cognitive functioning functional age psychosocial health comorbidity behavior deficits and more Psychopathology behavioral disorders changes in cognition and changes in everyday functioning are addressed in full and a wide range of conditions and disorders common to this patient population are covered Each chapter provides an empirical review of assessment instruments assessment scales in their totality a review of how these instruments are used with and adapted for different cultural groups illustration of assessments through case studies and information on how to utilize ongoing assessment in treatment and or treatment planning This combination of elements will make the volume the definitive assessment source for clinicians working with elderly patients The most comprehensive source of up to date data on gerontological assessment with review articles covering psychopathology behavioral disorders changes in cognition and changes in everyday functioning Consolidates broadly distributed literature into single source saving researchers and clinicians time in obtaining and translating information and improving the level of further research and care they can provide Chapters directly address the range of conditions and disorders most common for this patient population i e driving ability mental competency sleep nutrition sexual functioning demntias elder abuse depression anxiety disorders etc Fully informs readers regarding conditions most commonly encountered in real world treatment of an elderly patient population Each chapter cites case studies to illustrate assessment techniques Exposes reader to real world application of each assessment discussed
