Description

The 410TVX™ is designed as a full-range bass guitar enclosure. This enclosure is covered with tough, black vinyl to give the player a rugged and easy-to-clean surface. The metal corners and grille add protection from the bumps and bruises encountered "on the road."

The 410TVX utilizes four 10-inch Sheffield® bass guitar speakers, a horn tweeter and a custom crossover designed for great articulation, tone and clarity. A high frequency level control is part of the crossover so the high frequency output

can be tailored to complement any style of playing. A protection circuit has been incorporated into the crossover to help prevent damage to the horn tweeter in the event of overpowering. If the average signal level going to the tweeter exceeds a certain threshold, the protection circuit is engaged.

When this occurs, the horn will almost completely stop producing sound, until the signal level is reduced and the circuit disengages. Then the horn tweeter will again produce sound. Please note that this protection circuit is for long-term (average signal level) protection. It is still possible for transients (short-term peaks) to damage the horn.
