managers to balance pressures from different sectors and to minimize risks Scientific knowledge will continue to be the most important basis for resolving the conflicts between coastal users and interest groups such as developers and ecologists Coastal management has also shifted from traditional restorative or remedial actions towards planned avoidance of other conflicts Despite rapid advancement in coastal sciences over recent decades most of the major coastal issues have remained outstanding in the agenda Control of shoreline erosion and protecting sea level rise continue to be crucial problems facing coastal scientists Destructive coastal storms still cause tremendous damage particularly in low altitudes Wetland and estuary reclamation have led to the loss of the most valuable estuary wetlands which are required to sustain biological productivity and biodiversity This volume includes papers on marine and coastal pollution eutrophication aquaculture conservation and utilization coastal wetlands and coastal zone management
