Manual of Deixis in Romance Languages Konstanze Jungbluth, Federica Da Milano, 2015-10-16 Deixis as a field of research has generated increased interest in recent years. It is crucial for a number of different subdisciplines: pragmatics, semantics, cognitive and contrastive linguistics, to name just a few. The subject is of particular interest to experts and students, philosophers, teachers, philologists and psychologists interested in the study of their language or in comparing linguistic structures. The different deictic structures not only the items themselves but also the oppositions between them reflect the fact that neither the notions of space, time, person nor our use of them are identical cross-culturally. This diversity is not restricted to the difference between languages but also appears among related dialects and language varieties. This volume will provide an overview of the field focusing on Romance languages but also reaching beyond this perspective. Chapters on diachronic developments, language change, comparisons with other non-European languages and on interfaces with neighboring fields of interest are also included. The editors and authors hope that readers, regardless of their familiarity with Romance languages, will gain new insights into deixis in general and into the similarities and differences among deictic structures used in the languages of the world.

F.), 1876 Handbook of Research on Cultural Tourism and Sustainability Ribeiro de Almeida, Claudia, Martins, Joao Carlos, Gonçalves, Alexandra R., Quinteiro, Silvia, Gasparini, Maria Laura, 2022-04-22

The process of globalization based on major forms of entertainment consumption has promoted the interest of enlarged social actors toward cultural experiencing. Disseminated by social media, new forms of information and knowledge about exotic tourism destinations have endorsed an increasing interest in forms of cultural tourism. Covering a range of topics such as creative tourism and sustainable tourism, this major reference work is ideal for academicians, practitioners, professionals, policymakers, government officials, instructors and students.

DSM-5® Handbook on the Cultural Formulation Interview Edited by Roberto Lewis-Fernández M.D. M.T.S., Neil Krishan Aggarwal M.D. M.B.A. M.A., Ladson Hinton M.D., Devon E. Hinton M.D. Ph.D., Laurence J. Kirmayer M.D. F.R.C.P.C., 2015-05-06 The Cultural Formulation Interview (CFI) is a product of the arduous process that resulted in publication of the DSM-5 and only one book, DSM-5 Handbook of the Cultural Formulation Interview, provides clinicians with the background and guidance they need to implement the CFI. The Handbook teaches the reader how to conduct a cultural assessment using the CFI, which consists of

three types of semistructured interviews Although the CFI was not designed to be the sole basis for making a clinical diagnosis it can be used in research and clinical settings to enhance clinical understanding and decision making The volume presents techniques to help providers situate their work within the context of a patient's culture to enhance communication not only with those of different cultures but across all clinical encounters Especially instructive are the supplemental videos that demonstrate application of the CFI components through the use of clinical vignettes Clinicians will of course find the DSM 5 Handbook of the Cultural Formulation Interview indispensable but administrators policy makers advocates and other practitioners who work collaboratively to engage patients in the mental health care process will also value its clarity and comprehensiveness
