Functional Kinesiology in Health and Performance Elena Mainer Pardos, Hadi Nobari, Kelly Johnson, António José Figueiredo, 2024-05-29 The state of the world s health is critical Customers seek trustworthy healthcare professionals because the health industry is rife with contradicting information and out of date science Frequently students are still being taught out of date material and a variety of tools without any recommendations for practical application leaving them feeling overburdened perplexed and insecure Both of these issues were addressed by the invention of functional kinesiology Kinesiology is the application of the sciences of biomechanics anatomy physiology psychology and neuroscience to the study of human and animal movement performance and function It examines the mechanisms behind both human and animal movement with particular attention to the roles played by the skeletal joint and muscular systems Moreover a foundation and practitioner training pathway is provided by functional kinesiology The foundation training employs Kinesiology muscle monitoring and the concepts to evaluate the body s energy systems and rebalance them with safe and effective physical electrical emotional and dietary procedures Sports practice has health benefits in youth and adulthood Functional kinesiology is about combining the techniques of kinesiology with cutting edge research in functional nutrition and functional medicine This method tries to work with the six pillars mentioned above for people to regain their health fully Among them are diet adrenals and stress sex hormones digestion and immune and emotional transformation Given the growing participation of athletes in team and individual sports worldwide it is necessary to analyze the effect of kinesiology protocols on health and performance To push forward innovative approaches this Special Issue calls for original articles systematic reviews or meta analyses that may substantially contribute to data analysis related to functional kinesiology performance and health This Research Topic pursues the following goals explicitly Review of studies related to functional kinesiology of athletes in teenagers and adults Review of studies on how athletes achieve better health or performance Review of studies on the quality of training load with bio motor ability and wellness variables **Processes, Mechanisms and Solutions in Coastal Wetland to Adapt to Changing Environment** Qing Wang, Dongdong Shao, Yu Zhang, Qin Zhu, 2025-06-05 Coastal wetlands provide precious ecological services for us like coastal protection carbon storage flooding mitigation production and

so on Mangrove saltmarsh sea grass oyster reef and coral reef are typical types of coastal wetland each type has its unique adaptive strategy to climate change through some processes and mechanisms Some of them are well known to us but most are unrecognized as they are far away from our living environment Furthermore in the context of climate change and anthropogenic influence the external disturbance is more complicated and changeable causing the responses of species and the related processes more secluded and unpredictable Therefore the multilevel processes or mechanisms in coastal wetland to adapt to climate change as well as the solutions is urgent and important to face the new challenges Coastal wetlands lie in the transition zone between lands and seas defending us from storms and floodings and providing important and valuable ecosystem services such as carbon stock and biodiversity maintenance However coastal wetlands are vulnerable and are one of the most physically disturbed ecosystems on earth because they are always in hydrodynamic conditions under the interactions among tides waves runoffs and so on Furthermore the combined impacts of climate change and human activities have caused more uncertainties and complexities on the environmental factors which imposed unparalleled impacts on the diversity distribution and ecological performance of coastal wetland ecosystem globally
