Teaching and Learning for Adult Skill Acquisition Elaine M. Silva Mangiante,Kathy Peno,2021-05-01 The book Teaching and Learning for Adult Skill Acquisition

Applying the Dreyfus and Dreyfus Model in Different Fields will fill a unique niche in the field of adult higher and workforce education. It offers a current volume for scholars and practitioners based on both empirical studies and practice-based research on adult skill acquisition and development. Dreyfus and Dreyfus (1980, 1988, 2004, 2008) developed the novice to expert model of skill acquisition that illustrates growth over the course of a person's career in a particular domain. The skill model highlights a learner's movement across six levels of skill development: novice, advanced beginner, competent, proficient, expert, and mastery. This book will present examples of the application of the Dreyfus and Dreyfus model in different fields: i.e. health care, education, law enforcement, business, serious gaming, military ethics training, etc., providing insight into how practitioners can develop their skills in their particular domains and how educators can promote this development. This collection will be appropriate for a wide variety of professors, researchers, practitioners, and students in the field of adult higher and workforce education.

Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2022-04-01
Science is unique among the disciplines since it is inherently hands-on. However, the hands-on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high-quality experiences in an online environment that leads to age-grade-level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning (Killham et al. 2014; Wong et al. 2018), PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments (Molnar et al. 2021; Seaman et al. 2018). This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy (Brigido, Borrachero, Bermejo, Gunning, Duran, Duran, 2004). Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation.

Leadership Education and Training (LET) 1, 2001
Lesson Planning with Purpose Christy McConnell, Bradley Conrad, P. Bruce Uhrmacher, 2020
This book takes readers on a journey through many pathways to engaging and meaningful educational experiences. The text first discusses Perceptive Teaching and then explores five unique approaches to lesson planning: behaviorist, constructivist, aesthetic, ecological, and integrated social-emotional learning. Chapters end with a sample lesson that can be compared across approaches.
