

# Nurse Practitioner Clinical Practice Guidelines

Health Service

Calvary Health Care ACT

Speciality Area

Intensive Care

Setting

The Critical Care Unit at Calvary Health Care ACT is a 16 bed combined unit consisting of adult general intensive care, high dependency and acute coronary care beds. The Critical Care Unit admits approximately 1400 patients per year. Currently, ICU admissions account for approximately 54% of all admissions and have an average APACHE II score of 15.08.

The Nurse Practitioner will be based in the Intensive Care Unit and provide an intensive care liaison outreach service for the inpatient and outpatient areas within the organisation.

This document provides a clinical practice framework for the Intensive Care Liaison Nurse Practitioner at Calvary Health Care ACT.

## Nurse Practitioner Role

The Intensive Care Liaison Nurse Practitioner (ICL NP) is a Registered Nurse who is authorised to provide an expert level of coordinated clinical care, health assessment and management for patients within the Intensive Care Unit, inpatient and outpatient services at Calvary Health Care ACT (Public Hospital).

The main aims of the role are to:

- avert admissions to critical care by identifying patients who are deteriorating and preventing admission where possible, or facilitating timely treatment and critical care admission when not possible, to ensure the best outcome
- enable discharges by supporting the continuing recovery of discharged patients.
- share critical care skills with staff in wards and the community

## Client/Patient Population

The ICL NP will use expert clinical nursing practice to both collaboratively and autonomously initiate, provide and maintain a continuum of care for adult critical care patients throughout the spectrum of acute care within and external to the ICU. The adult patient is defined as persons above the age of 18 years.

The ICL NP will:

1. Attend medical emergency team (MET) calls and participate as a team member or team leader if required.
2. Provide follow-up assessment of patients that have had a MET call and continue to be cared for in the ward setting.
3. Provide assessment and participation in the management, care planning and liaison with carers of complex patients referred to the Intensive Care Liaison NP who are:
  - Awaiting ICU/HDU admission or inter-hospital transfer to a critical care unit
  - Scheduled for discharge from ICU/HDU
  - Discharged from ICU/HDU
  - Referred to the Intensive Care Liaison NP from the ward/outpatient services.

**How Nursing has Changed with Technology, An Issue of Nursing** Maria Overstreet, 2015-06-14 How has technology changed the art and science of nursing practice Many facets of nursing practice have stayed constant over the years such as the way we advocate for our patients and the art of caring for our patients However nursing practice has evolved over the years especially in the bedside delivery of state of the art nursing care Technology at the bedside has forced nurse educators to change the ways in which we always have taught nursing students Technology has also begun to change the methods used in the actual bedside nursing care In this issue you will hear from some of the nursing experts in areas of nursing care that has changed in either the delivery of care or method of assessing care of the patient Nursing experts will describe some of the historical changes and intrigue you in the changes expected to come to the bedside Why is this issue important First we gain insight from a review of where we have been and nurses tend to reminisce on our past as well as romance our historical roots Second technology is ever changing and it is good practice to keep abreast of what is happening in other areas of nursing so that we can apply others successes in our own specific areas of nursing Third informatics in nursing is a growing field and nursing must embrace technology and learn to adapt various methods of delivery so that we can appropriately care for and advocate for our patients With the changes in our national

healthcare system we must encourage nurses to try out new methods of delivery as well as encourage their ideas of how nursing can change The articles in this issue reflect these changes      **Study Guide for Brunner & Suddarth's Textbook of Medical-Surgical Nursing** Janice L. Hinkle, Kerry H. Cheever, 2013-11-25 The perfect companion to Brunner Suddarth's Textbook of Medical Surgical Nursing this exemplary study tool helps you better understand the concepts disease processes and nursing care detailed in the textbook Designed to help you review and apply important concepts from the textbook to prepare for exams as well as for your nursing career each fully revised chapter includes three sections Assessing Your Understanding including fill in the blank short answer and matching questions Applying Your Knowledge comprised of case based questions and Practicing for NCLEX containing both multiple choice and alternate format NCLEX style questions An Answer Key is included at the end of the book
